Chicago, Jan. 27.—(AP)—Even Forecast J. R. Lloyd shivered as he looked up from his maps and data to predict at least another 24 hours of sub-zero cold with which gripped most of the nation, which today counted a death list of at least 225 persons since Wednesday.

The cold wave, which generally had avoided the Pacific coast states, today entered the State of Washington. Spokane had a minimum of 16 degrees yesterday, which was the coldest temperature there since last October.

The abnormal weather, described as "the worst of the twentieth century," extended south into Oklahoma, Texas and parts of Florida.

A snow blanket covered the northern states and extended as far south as North Carolina, where one to two inches fell.

More snow was in prospect for many sections. A light fall started at midnight in New York City, where the temperature was 23 at midnight. Many up-State roads remained blocked.

McDonald, of Winston-Salem in his campaign for governor that the sales tax forces in the 1933 General Assembly wrecked the schools and deprived them of \$8,200,000 of revenue from property taxes which the schools had previously had from 1931 to 1933, is causing much interest in political and governmental circles here. It is also causing much searching of old files and records in an effort to get at the real facts in the case.

Industry Strikes Record Since 1930 In Past December

Washington, Jan. 27.—(AP)—The Federal Reserve Board's monthly summary of business and finance today reported a new high point in industrial production since the spring of 1930, was reached in December.

The board index advanced from the 98 percent of the 1923-25 average in November to 103 the next month.

Factory payrolls were reported larger in this December than a month before. Department store sales and mail order businesses were reported greater than usual. While freight car loadings declined, the drop was less than usual for the period, the summary reported.

"The rise in the index was due in large part," the summary said, "to increase in output of durable manufacturers, particularly to iron and steel and automobiles."

The output of mines and shoe factories increased and activities in textile mills declined less than usual.

Method of Financing Payment Remains To Be Seen; Loud Applause in Senate Grets Announcement Of Overwhelming Vote; House Acted Last Friday

Washington, Jan. 27 (AP)—Immediate payment of the soldiers' bonus was made law by Congress today over President Roosevelt's veto.

The Senate, with its big Democratic majority, voted 76 to 19 to override the chief executive's veto.

The House had smashed it down last Friday, 324 to 61.

The two ballots which saw top Democratic leaders go against the President on the 16-year-old issue, put the \$2,491,000,000 bond payment plan on the statute books.

They raised also for Mr. Roosevelt and his financial advisors the serious problem of finding funds to meet the new drain on the Treasury.

Whether new taxes will be asked to meet this extra budget outlay—estimated to require an immediate expenditure of one billion dollars—remained to be seen.

The new law itself merely authorizes an appropriation of \$2,237,000,000
