FEDERAL MILITIA FORMS NEW LINES

Defenses Strengthened West of San Sebastian, While Government Claims Mile-Long Advance Against Rebels Advancing on Toledo and Madrid

(By The Associated Press) A new and apparently serious split in the government defense of northern Spain opened up today while the militiamen of Madrid, on the central battleground, announced they had plowed a mile-deep hole

into the Fascist front. Basque nationalists in the north, who previously had broken with an-archists because the latter fired Irun before it was taken by the Fascists, set up a virtually autonomous government and ousted the anarchists from all government posts in the territory, still dominated by friends

of the Madrid regime. Government militiamen, strong, also formed a new battle line west and south of fallen San Sebastian, while at Bilbao, still farther to the west, government firing squads blasted out the lives of 62 officers

who attempted a revolt. Government forces in central Spain, fighting desperately to stem the Fascist advances on Toledo and Madrid, claimed the mile-long advance in the Santa Olalla sector, 24 miles from Toledo. New triumphs also were announced for the Madrid

militiamen in Cordoba province. In Madrid, United States diplomatis authorities set Tuesday as the final deadline for use of the American Embassy for refugees. It then will be closed, with officials remaining in the capital in private residences.

Ground forces, with the government hurrying all available reinforcements into the line against Moorish troops, were regarded as evenly matched. The strong detachments of Catalian militia arrived to strengthen the defenses of Toledo and Madrid.
