

World Awaits Outcome of Horthy's Nazi Visit

Nazi naval review; Admiral Horthy, right, and Fuehrer Hitler

Visit of Admiral Horthy of Hungary, regent of the vacant Hungarian throne, to Kiel, Germany, for important conversations with Fuehrer Adolf Hitler, draws the attention of the world. The Nazi press heralds Horthy's state visit as presaging new neighborly friendship. Pomp and circumstance surrounding the visit, such as an impressive Nazi naval show, was an indication of Hitler's desire to bring adjacent Hungary more completely into the Nazi sphere. Hungary's favor is also sought by the Little Entente which seeks to check the increasing influence of Germany on central European affairs. Horthy's visit is thought by some to be the prelude to extended Nazification of Hungary which occupies a strategic position in the Danube valley and is important as a source of grain and foodstuff, sorely needed by Germany.
