### THIMBLE THEATRE Starring POPEYE

### A Way With The Ladies

### 'A KETT'

By PAUL ROBINSON

**ACROSS**

1—Prance  
5—A passage between seats  
9—A nocturnal bird  
10—Division of a play  
12—Drone  
13—Reefs in the Gulf of Mexico  
15—Reliable  
16—A ridge of glacial drift  
17—Inhabitant of an island  
20—Exclamations of delight  
22—Covered with mud  
23—Definite

**DOWN**

1—Powder of cacao  
2—Washed by waves  
3—One of the twists in yarn  
4—Sun god  
5—By  
6—Quake  
7—Enticed  
8—A grinding agent  
11—Pass between

adjacent mountain peaks  
14—Symbol for silicon  
15—A rebuff  
18—Worn out  
19—Accumulate  
21—Faithful  
24—Suggestion  
26—A bit  
27—Excursions

29—Modify  
30—Titter  
32—Wapiti  
33—Provided that  
37—Prescription term  
39—Expression of pain  
40—Form of the verb "to be"

### THE OLD HOME TOWN

Registered U. S. Patent Office

By STANLEY

**MARSHAL OTEY WALKER, BEING AN EXPERT ON PIES - KNOWS THE EXACT DISPLACEMENT OF A DRIED APPLE PIE WHEN WATER-SOAKED**

### SCOTT'S SCRAP BOOK

Registered U. S. Patent Office

LEATHER, TASTELESS OILS, FOOD, GLUE, CHEMICALS USED IN TANNING, MEDICINAL OILS, AND FERTILIZERS ARE PRODUCED FROM SHARK BY A FIRM IN AUSTRALIA

INDIANS OF MEXICO AND CENTRAL AMERICA MADE CHOCOLATE BEFORE COLUMBUS DISCOVERED AMERICA

ALL STAMPS OF CARINTHIA, WHICH HAD STAMPS IN 1920, WERE SOLD AT THREE TIMES THE FACE VALUE

ONLY 1.7 PER CENT OF ITS PEOPLE ARE 65 YEARS OR OVER - IT IS AN INDUSTRIAL CITY

THE "YOUNGEST AMERICAN CITY" IS GARY, INDIANA, MEASURED BY ITS CITIZENS' BIRTHDAYS, NOT ITS OWN FOUNDING

### BARCLAY ON BRIDGE

**HOLD YOUR TONGUE**

IF AN OPPONENT commits some irregularity, such as a lead out of turn or from the wrong hand in the case of dealer, you will do well to think a moment before speaking. Of course you do not play bridge primarily for the purpose of getting from such occurrences. But rather do you wish to suffer ungrudgingly from them, as you may if you speak at the wrong time or say the wrong thing in your haste.

to try out the diamond finesse, South led the diamond Q, whereupon West shouted: "The lead is in dummy." Crestfallen, declarer felt his haste had ruined his chances for the slam, but he "took the bull by the horns" and laid down the diamond A. Imagine his joy when East's singleton K dropped. Declarer took two more rounds of trumps and forced out the heart A, which was the only trick the opponents cashed.

It is impossible to quote the remarks of East. When the diamond Q was led he knew the contract was doomed, but West's remarks handed the slam to the opponents.

**Tomorrow's Problem**

♠ Q J 9 7 5  
♥ Q 9 8 2  
♦ 10 3 2  
♣ 4

♠ A K 10 6  
♥ 10 8 6  
♦ K 7 5  
♣ K J 5

(Dealer: North. East-West vulnerable.)

North started the bidding on this deal with 1-Spade. South responded with 2-Hearts. North bid 2-Spades, South 3-Diamonds, North 4-No Trump, South 5-Diamonds and North 6-Diamonds.

West's opening lead against this contract was the spade Q, which was won in the dummy with the K and a heart discarded. In his anxiety

(Dealer: South. East-West vulnerable.)

What is the correct bidding on this deal?

### Modern Methods of Kidney Diagnosis Are Very Precise

By LOGAN CLENDENING, M. D.

MODERN MEDICAL science, especially in its chemical researches, has developed very exact methods of kidney diagnosis. But the results must be interpreted with wisdom and experience.

In the first place, as we explained in an early article this week, the cells of the kidney may be out of commission so that they do not remove all of the waste products which it is their business to remove from the blood. In that case, those products accumulate in the blood. Modern chemistry has developed very exact methods of recognizing these quantitatively so that the exact amounts present can be determined. If they are in excess of normal, it is known that the kidney is not doing its full work and adjustments in diet can be made to suit its lowered functional capacity.

**Aids in Diagnosis**

The study of the patient's whole body—the blood pressure, the heart, the retina of the eye—aids in assessing the patient's true condition. The blood vessels in the back of the eye have been found to undergo almost the same changes, simultaneously, as the vessels in the kidneys, so that a true picture of their condition can be reached by viewing the eye with the ophthalmoscope.

Dye tests for kidney function are very useful. The kidney in health is able to pick up certain dyes from the blood and excrete them 100 per cent in a short time. A dye which can easily be recognized is injected into the vein of the arm, and all the urine is collected for two hours. If 50 per cent of the dye is collected in this time, the kidneys are considered normal.

I have not said anything as yet about the examination of the urine itself. This was the only method known for the diagnosis of kidney complaints half a century ago, and while it does yield valuable results,

we have learned to take the interpretations of our predecessors with a great deal of caution. The findings of a urinalysis must be considered in the light of the condition of the whole man.

**Dangerous Practice**

That is what makes the widespread practice of laymen depending on the reports of a commercial laboratory so dangerous. Many a man has received a sheet of paper with a purple hand pointing to some abnormality in the urine, and had his whole day, nay, his whole week, darkened by that token.

For instance, even albumin in the urine does not necessarily mean Bright's disease. There are many, many cases, especially in young people, where albumin is present and it does not mean a thing. Thousands of them go on for years in perfect health and do not even know they are passing albumin.

Put the purple hand out of your life and get a doctor's slant.

**QUESTIONS AND ANSWERS**

W. R. K.: "Which is the most unhealthy and which is the most healthy of these sugars: corn sugar, sea island granulated, pulverized sugar, brown sugar, maple sugar, honey that has sugared?"

Answer: None of them is unhealthy. There is very little chemical difference between them.

F. L.: "No doubt there are numerous people faced with this simple but important problem. A small home and one husky sound sleeper who snores, nearly all of each night. He feels badly about disturbing the sleep of others, but as he is the one receiving the salary he definitely needs the rest."

Answer: I know of no way to stop snoring, but I print the letter as a human document. If any of my readers can make a suggestion, I will be glad to forward it.

### IG SISTER

### THE GUMPS—LOVE MAY BE BLIND—BUT NOT DEAF
