

GAINES IS FINALS SPEAKER AT STATE

W. & L. University Head to Deliver Message Monday Evening, June 5

Raleigh, April 25.—State College's commencement address will be delivered Monday evening, June 5, by Dr. Francis Pendleton Gaines, president of Washington and Lee University in Lexington, Va.

Finals Speaker

DR. FRANCIS P. GAINES

The commencement address at State College will be delivered Monday evening, June 5, by Dr. Francis Pendleton Gaines, president of Washington and Lee University and former president of Wake Forest College.

Capital Gossip

By HENRY AVERILL

Raleigh, April 26.—Operations against the Japanese beetle, pest over which there was so much discussion during the recent legislature, have resulted in treatment of some 150 acres in four cities, while soil poisoning is in progress in several other localities.

Completed operations include 50 acres treated in Winston-Salem, 70 acres in Greensboro, 20 acres in Wilmington and 10 acres in Sanford.

Other city work still to be finished includes Charlotte, 6 acres; Durham 7 acres; Elizabeth City, 7 acres; High Point 10 acres; Spencer and E. Spencer, 55 acres; and Raleigh, 8 acres.

The treatment consists in application of 1,000 pounds of arsenate of lead per acre by government sprayers. This treatment is said to be practically 100 per cent effective, and if the beetle can be effectively poisoned in the cities where they always start first, spread to crop centers can be prevented for an indefinite time.

No titles changed as the result of Charlotte's city head election. It's still Mayor Ben Douglas and Representative J. B. Vogler.

Senator Jack Morpew came down from the mountains of Graham to Raleigh Tuesday. He says prospects for a fine tourist season in the west are extremely bright, if early signs are really indicative.

He cited the recent opening of Lake Santeel to fishermen for two days and the resultant collection of something like \$400 in license fees from the ambitious anglers who literally fringed the wonderfully beautiful lake.

Office hours in all State departments, bureaus and agencies will change Monday, May 1. Work will start at 8:30, half hour earlier than at present, lunch interim and closing time will be correspondingly advanced to 12:30 and 4:30 p. m.

Rumor will not die that Congressman Lindsay Warren will run for the gubernatorial nomination next year. It seems rather far-fetched, what with the Washington, D. C. and N. C., lawmaker so near the top of the Federal ladder.

Duke Electrical Instructor Developes Important Device

Durham, April 26.—The United States patent office has just issued patent No. 2,154,354 to Russell Ranson, instructor in electrical engineering at Duke university. The title of the patent is "Regulators", and in it is described a number of methods of controlling the output voltage of electric generators, or other devices, by means of certain types of vacuum tubes, the tubes themselves being controlled by special voltage sensitive circuits devised by Mr. Ranson. The device is of wide applicability to all types of direct current generators, and makes available for the first time a simple, accurate, and reliable method for obtaining a constant and predetermined output voltage which is so necessary for many industrial applications.

Heretofore closely regulated output voltage has been attained only by means of such complicated devices that the cost was prohibitive except in a few extreme cases. Mr. Ranson's regulator is simple and inexpensive. At the same time it permits of much closer regulation than has ever before been obtained with commercial devices. It makes laboratory regulation available to industry at large.

The extensive research work required for this development was carried out in the laboratories of the electrical engineering department. When Mr. Ranson first came here in 1935 he was assigned the task of developing a much needed voltage regulator for the use of the laboratory, there being none available at that time.

The research finally resulted in the device for which the patent was issued. The first regulator built is now in use in the electrical machinery laboratory, the only college laboratory in the country supplied with such closely regulated direct current supply. A number of the regulators are now in use in the steel mills where the speed of rolling mills must be closely regulated. Other applications of the method of control are now under investigation by steel manufacturers.

Mr. Ranson has resigned from Duke university, effective in June, and goes with the Clark Controller Co., of Cleveland, Ohio, as director of electronic research and development.

Mr. Ranson has resigned from Duke university, effective in June, and goes with the Clark Controller Co., of Cleveland, Ohio, as director of electronic research and development.

More Waters Designated As "Commercial"

Daily Dispatch Bureau, In the Sir Walter Hotel.

Raleigh, April 26.—There are 37 bodies of "commercial fishing waters" in North Carolina, in addition to the ocean and sounds, according to a list issued by the Department of Conservation and Development as the result of hundreds of requests it received after it had been announced that fishing with reel and rod or hook and line is permitted in commercial waters at all seasons.

- (1) Alligator River below Gum Neck.
- (2) Bay river below Bayboro.
- (3) Brunswick River.
- (4) Cape Fear River below Old Mossy Tree, 1 mile below King Bluff locks.
- (5) Cashie River.
- (6) Catawba River below South Fork River.
- (7) Chowan River to Virginia line.
- (8) Frying Pan river below Cooper's creek, exclusive of the Narrows.
- (9) Goose Creek, a tributary of the Neuse, below the Narrows.
- (10) Lower Broad Creek, a tributary of the Neuse below the old mill site.
- (11) Lower Goose Creek, a tributary of the Pamlico, below a line from Pasture point to Long Neck Point.
- (12) Little River below Nixonton.
- (13) Lockwood Folly river below Supply.
- (14) Meherrin River to Virginia line.
- (15) Neuse River below Highway 117 Bridge below Goldsboro.
- (16) Newport River below the Narrows.
- (17) New River below A. C. L. bridge 1 1-2 miles below Jacksonville.
- (18) North Prong of North Creek, a tributary of the Pamlico below Frank Credle's landing.

Commencement Speaker

Pictured above is Dr. Daniel B. Bryan of Wake Forest College who will make the address at the Townsville public school commencement at 8:00 o'clock on the evening of May 15, Prin. David Gay announces.

Dr. Bryan has been dean of Wake Forest College since 1921 and is founder and general director of the popular Wake Forest-Meredith summer school. He is well known and highly regarded throughout the state and has taught a good many school men and women in this area.

EXTEND TIME FOR ESSAY ON COTTON

N. C. Cotton Growers Cooperative Gives More Time for Filing Entries

Raleigh, April 26.—M. G. Mann, General Manager of the North Carolina Cotton Growers Cooperative Association and the Farmers Cooperative Exchange, announced today a 15-day extension in the deadline for entries in the 12th annual Cooperative Essay Contest, sponsored jointly by the two organizations he heads and the Carolina Co-operator.

Mann said that entries in the contest will be accepted as late as May 15. The deadline formerly established was for May first.

"Never a day passes but what we get additional inquiries from students for material to be used in preparing their essays," he said in announcing the extension of the time limit.

More than 150 rural schools are represented by high school students competing for a number of cash prizes and other awards, topped by the first state-wide prize of \$100 in cash and a one-year college tuition scholarship.

Students entering the contest this

year are writing on the subject: "How Rural Life in North Carolina Can Be Enriched."

MARSHAL GOERING KEEPS TAILORS BUSY

Berlin, April 26.—(AP)—Business is good for Field Marshal Herman Wilhelm Goering's tailors.

The No. 2 Nazi lost so much weight during a vacation in Italy that all his uniforms have to be taken in at the seams. He has a lot of them.

One purpose of his Italian trip was to reduce. Before that his weight—not disclosed but much over 200 pounds—was the subject of many jokes.

Among the imposing uniforms in his closet are those of field marshal of the air force, general of infantry, S. A. guards chief, national forester and reichs master of the hunt.

AMBASSADOR DANIELS TO SPEAK AT SALEM

Winston-Salem, April 26.—(AP)—Dr. Howard Rondthaler, president, has announced Josephus Daniels, ambassador to Mexico, would deliver the literary address at Salem college's 167th commencement exercises June 5.

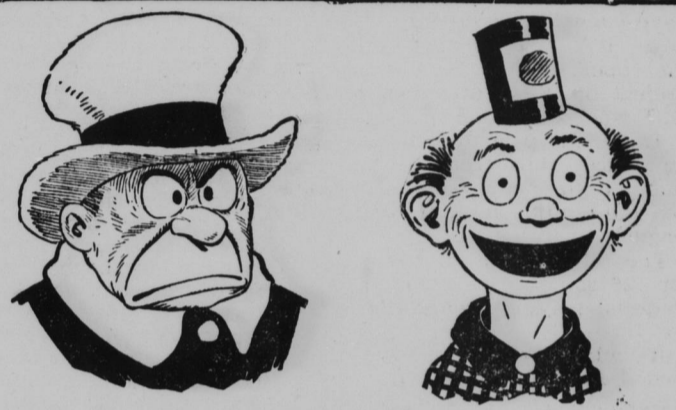

The Rev. Donald Houston, pastor of the First Presbyterian church of Chapel Hill, will deliver the baccalaureate sermon June 4.

EMPHASIS URGED FOR COTTON USES

Raleigh, April 26.—(AP)—Governor Hoyer urged North Carolinians today to emphasize the "importance of the use of cotton goods" during National Cotton week, May 22-27.

In a statement, he said he was "glad to call attention to the observance of this week and to point out to both the merchants and distributors of cotton wares, and to their consumers, the importance of the development of our national cotton consumption."

Mental Millstones are Going Out of Style

Too often we have met a person who was content to wear defeat like a millstone 'round his neck. How refreshing it was to see him resolve to use his neck to hold up his chin! Then he saw a failure for what it should be—not a millstone but a milestone on the road to long-range achievement. It's how well he carried on that was all-important. He had looked defeat in the face and no longer feared it. Nor would he let mild success lull him into lazy contentment. He was ready for his full share of the glorious opportunities that America alone can offer him. He went swinging down the highway with the courage of youth—the spirit of America.

Live Life... Every golden minute of it Enjoy Budweiser... Every golden drop of it

ANHEUSER-BUSCH Makers of the World-Famous Budweiser

MAKE THIS TEST DRINK Budweiser FOR FIVE DAYS. ON THE SIXTH DAY TRY TO DRINK A SWEET BEER. YOU WILL WANT Budweiser'S FLAVOR THEREAFTER.
