Well Known Educator to Testify Monday On Nazi Designs on United States; Democrats Expected to Be More Cohesive Next Year.

Washington, Aug. 19.—(AP)—Told that Nazi Germany intends eventually to gobble up the United States, the Dies committee centered its attention today upon how this might be brought about.

A committee representative said, 'a well known educator whose professional standing and knowledge is beyond dispute," would be called Monday to testify concerning efforts to introduce Nazi teachings in American colleges. He added that his testimony would deal with firsthand experience, but declined to disclose the educator's name.

Some seasoned Democratic leaders are predicting that the practical problem of re-election, which faces so many Democratic members of Congress in 1940, may serve to narrow the breach in the party's ranks during the next session. Although a Democratic - Republican coalition worked effectively against much administration legislation during the last session they said it might be more difficult to continue such a working agreement next year.

Georgia Has **Total Sales** 100 Million

Average \$12.89 as Final Week's Sales Amount to 4,000,000 Pounds; Farmer Sales Among Highest In Belt's History.

Atlanta, Ga., Aug. 19.—(AP)—with fourteen of the 65 warehouses unreported, Georgia's total tobacco sales for the season were given toaverage \$12.89 per hundredweight. Stiles Martin, statistician of the State Agriculture Department, who said fourth week sales, which ended yesterday, approximated 4,000,000 pounds. He estimated this went at an average of about 11.25 cents.

The season record for poundage in Georgia is 103,395,159 pounds, established in 1930, when the average

price was 9.86 cents. Farmer sales this year have been exceeded only five times in the 22year-history of the bright leaf markets, and approached closely the total for one of the five years, 193., when sales amounted to \$13,281.-

The dollar volume was made up from the heavy sales, however, as he average price of 12.89 was lower than the average for 16 of the 22 years of the market.
