Britain To Expedite U. S. Exports

Washington, Nov. 22.—(AP)—Great Britain's plan to expedite American exports to neutral countries may aid her in checking any flow of American goods to Germany.

The arrangement, announced yesterday by the British Embassy, provides for issuance of certificates to exporters, showing that consignments are "unobjectionable" to the British. The certificate, called "navicerts", will be issued by British consulates to beginning December 1. The system amounts to a pre-examination of a cargo, and is designed to prevent delays when British contraband patrols search vessels for contraband. It will operate on American shipments to ten neutral countries—Belgium, Denmark, Estonia, Finland, Iceland, Italy, Latvia, The Netherlands, Norway and Sweden.

One authority predicted today that the British would maintain a central control over the system in London.

Heavy Aerial Bombings By Japs On The Chinese

The zone of hostilities was the hilly border region of southern Kwangsi, north of the point where the Japanese started a landing in force just a week ago.

The bombardment damage was not specified in the war report, but the Japanese pamphlets were said to have urged the populace to cease resistance and cooperate with the Japanese.

French Chinese troops—Kwangsi is one of the most militarized provinces—were rushed to the border region, and appeared to have stemmed the Japanese offensive.
