Babson In Plea For

Noted Economist Says American "Front" Now in Europe: Declares America Should Give Credits To Allies.

BY ROGER W. BABSON, Copyright 1940, Publishers Financial Bureau.

Washington, June 14.--It now must be clear to every American that Hitler stands for world domination. The United States suddenly finds berself in a desperate position—caught between Allied Canada and unstable Mexico. New methods of warfare bring home to us the startling pre-cariousness of this position. Until the advent of the bombing plane, isolation was a wonderful theory. Today, tms concept, like neutrality and international law, is as dead as a door nail. A pack of wild animals are roving over the world. To protect Ameren, we should immediately give the allies credit and all our available material.

To be realistic, the question today

is not shall we get into the war-but rather, how shall we get out of it? Do we choose to fight on American soil or choose to fight on foreign soil? The line between defense and participation is becoming thinner less distinct every day. Back in 1919, we were sure that we had fought for a right cause. The imperial German army differed from the present nazi army only in that it was less dia-bolical. less brutal, less ruthless. Twenty-five years ago we joined the allies to save the world for demo-cracy. We believed that we were

Too Kind or Too Harsh? Our great mistake was in under-
