Scottlanders Sop Up Gravy Of Broughton Appointments

Daily Dispatch Bureau, In The Sir Walter Hotel, By HENRY AVERILL

Raleigh, April 22.—Scotland is sopping up the political gravy of Governor J. Motley Broughton's appointments although the county was not covered by the governor in the 1940 primary.

Already James H. Jones, a Scotland citizen, has been named one of the members of the "big" cabinet of the governor. Jones is head of the department of Conservation and Development.

Already a notice was issued by the county clerk to call for the election of the very eminent member of the cabinet of the State High Court. The notice was issued to the members of the cabinet of the State High Court.

Wife Preservers
To give your morning glories, sweet peas, nasturtiums and petunias an early start, plant seeds in the house now and set the plants out when weather permits.

*Buick Special 6-passenger Sedan, \$1,006, white sidewall tires extra.**

1941 PLATFORM
More Dimes per Dollar

It certainly would be a grand thing if these days if you could count on every dollar doing its share as completely as the dollars that buy gasoline for the trim new 1941 Buicks.

For in any of these magnificent cars you can have Compound Carburetion, which adds as much as an extra ten or fifteen cents to the buying power of each gasoline dollar.

It works like this:

With FIREBALL design and Compound Carburetion, the same-size Buick engines now give from 18 to 24 more horsepower than last year.

We expend that horsepower through rear-axle gears that travel you farther for each revolution of the engine.

At the same time, the rate of fuel is fed to your engine according to need—in light loads only one carburetor functions, when plenty-power is wanted the other also comes in.

Thus, all the time, your engine is operating on the most efficient fuel supply for the job in hand, while your speeding rear wheels are stretching the miles out behind you.

So if you'd like an extra dime or more from each gasoline dollar, why not ask a Buick dealer how Buick does it?

With FIREBALL design and Compound Carburetion, the same-size Buick engines now give from 18 to 24 more horsepower than last year.

We expend that horsepower through rear-axle gears that travel you farther for each revolution of the engine.
