

## Use Of Tin Is Restricted

Washington, Feb. 12.—(AP)—A sharp reduction in the supply of tin cans poses a new wartime problem. Today the American housewife, already facing the rigid rationing of many commodities, has had to learn that she must not be placed in tin containers. The tin cans for certain secondary and special products will be restricted to the 1941 output and the manufacture of small cans will be curtailed.

No tin cans will be produced on the basis of the tin rationing, but tin-plated products, such as cans for vegetables, tomato juice, milk and fat.

## Work Resumed At Ford Plant

Detroit, Feb. 12.—(AP)—Work has resumed at the Ford Motor Co. plant in Dearborn, Mich., after a 24-hour strike by the United Auto Workers.

The union's demand for a 10 percent wage increase and a 40-hour week was rejected by the company.

Work resumed at 7 a. m. in the assembly plant, where the company is producing cars for the government.

The strike was the first since the war began in 1941.

## Heavy Toll Of Japanese Is Exacted

British warships sank a Japanese transport ship in the Indian Ocean, according to a report from London.

The ship was carrying a large amount of supplies for the Japanese forces in the East Indies.

The British warships were the HMS *Blackburn* and the HMS *Blackburn*.

The Japanese transport ship was the *Shimada Maru*.

# To The Defense of America

The 60,000 members of 4-H clubs in North Carolina and the thousands of other young people who are involved in 4-H work, will play an important part in the production of "Food for Victory." These pictures, assembled by L. R. Harrell of State College, N. C., show the activities of 4-H members in the Extension Service during some of the activities of the year.

The pictures are shown: (1) garden and backyard projects; (2) canning and food preparation; and (3) dairy club work. The boy and girl in the center (picture No. 3) are typical of the healthy, alert, forward-looking 4-H members all over the state. Harrell says that the 4-H objectives during the war emergency will be to see that every farm home has a garden, and to join with all other organizations and individuals to make sure that the forces of evil are destroyed.

## Sub Sinking Total To 25

(Continued from page One)  
Three of the tanker's four life boats still are missing.

Last night the third naval district announced that a South American steamer sighted a lifeboat containing a number of bodies off the Atlantic coast yesterday, but were forced to flee when a submarine popped up in the vicinity.

**JAP ENVOY KILLED**  
Paris, Feb. 12.—(AP)—Sotomatsu Kato, Japanese ambassador to France and former minister to Canada, was injured fatally last night when he fell from a window of the embassy on Avenue H ebe.

**PULLORUM DISEASE**  
More chicks die each year from pullorum disease than from any other known poultry trouble, says H. C. Ganger, poultry disease specialist of N. C. State College.

## Jim eats breakfast at the SUPPER table now!

\$2.35 QUART \$1.25 PINT

It's a screwy schedule. Jim downs a man-sized dinner while Mom's doing the breakfast dishes, sleeps the day away, and gets breakfast at the family supper table! He's on the midnight shift at the munitions plant.

The night is bright with light when Jim goes to work. Machines that have been humming 24 hours a day scarcely pause as fresh men take over the all-out job of giving arms to Democracy.

Continuous production makes tremendous demands on men, machines, and on the electric service that powers practically every operation.

But the power is always there — day and night — Sundays and holidays — 365 days a year. The electric industry was ready when the crisis came — ready to turn the eager wheels of almost every arms factory — ready to meet new needs with new construction. 1941 saw more than 2½ million more horsepower

installed — enough to light one fourth of all the homes in the U. S. A!

America's electric companies have been able to accomplish this by good business management — by producing about 75 of the nation's electric power and making it available almost anywhere, over carefully interconnected systems.

We're glad we can make this report — and glad to pledge our unending effort to supply millions of Jims with all the electric power they need to make America POWERFUL!
