

# ABC Heads Fear 'Return' Of Bootlegger In State

Daily Dispatch Bureau. In the Sir Walter Hotel. By LYNN NISBET.

Raleigh, June 2.—(Special) The ABC committee met in Raleigh Tuesday to consider the whisky shortage and to try plans to prevent bootlegging. The committee, which has the cooperation of the State Police, is headed by Dr. J. H. ...

## NEW REGULATIONS ON FARM GASOLINE

New regulations on rationing of gasoline for farmers were announced today following a joint meeting of the State Farm Transportation Committee and the OPA rationing committee. The OPA rationing committee chairman and vice chairman of the County AAA committee ...

## Wuppertal Target

WUPPERTAL (arrow), home of the giant I. G. Farben Industries, the world's greatest chemical syndicate is spotlighted under the surprise attack of the R. A. F. For the first time, British bombers dropped 120 tons of explosives on the congested German city on the edge of the Ruhr valley, leaving scores of houses in ruins. (Continued)

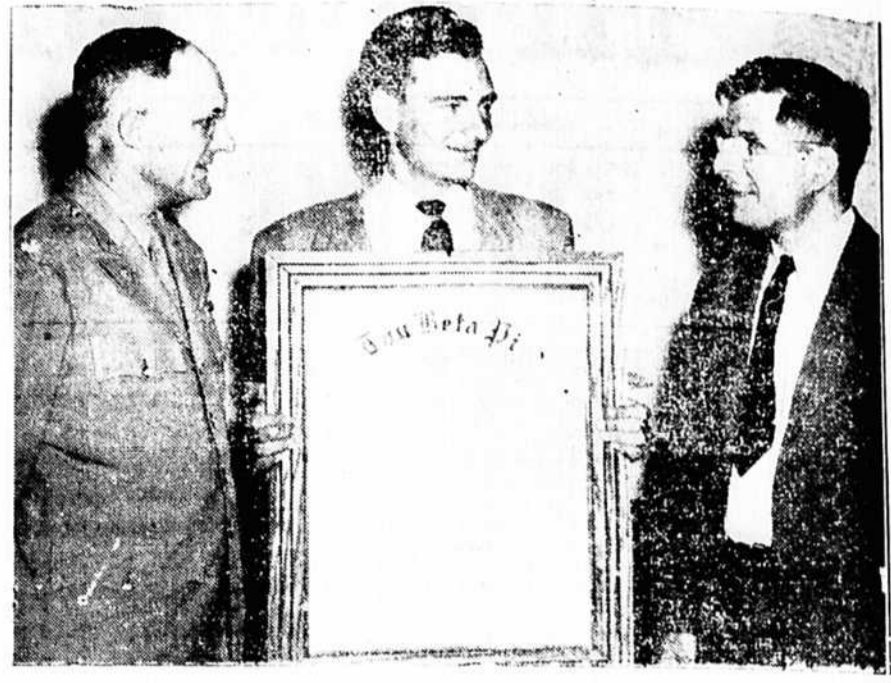

## Compliance Rules From Crop Group

Regulations governing compliance under the AAA farm program have been adopted by the local community committee.

The rules cover crop reporting on cotton, tobacco, and war crops and soil building practices. It will be the responsibility of the individual farmer to make report to his local AAA community committee and he cannot receive cotton and tobacco marketing cards until the report is made. This compliance work should be completed by June 30, it is stated.

A schedule of compliance work was announced. In the list which follows, the community is named for 1, then the meeting place, and dates and hours: Dobney, Red Oak Service Station, 12th and 26th (Saturday) 8 a. m. to 5 p. m. ...

Three cars of feed wheat are expected to be received in Henderson in the next few days for distribution among farmers, the AAA office in the Horner building announced today. Any person desiring any of the wheat should notify the office immediately. The price is \$1.14 per bushel.

## AROUND TOWN

**FINED FOR SPEEDING** Charles T. Eaves, white, was charged in police court today with speeding and was fined \$5 and cost. **FIRE DAMAGE** Firemen answered a call at 6:40 p. m. Tuesday to the home of Eddie Bullard, colored, on Street Orange street. Damage to the dwelling was estimated at \$15 by Fire Chief Corp and Ellis.

## Most Items of Revenue For State on Increase

(Continued from Page One) That was due to the fact that excise taxes were charged on gasoline sold to military and other governmental agencies on which the usual road tax was not collectible. However, the attorney general has recently ruled that this tax cannot be charged against non-taxable gasoline and the State will lose a few hundred dollars every month.

## Steps Used In Diagnosis

Dr. Logan CLEMMING, M.D. IN ORDER to explain the point of view of your physician while he is analyzing out the procedure of why he has found out what is the matter with you and what he had best do for you, let me go a little further into the subject of the history, which we discussed briefly yesterday.

## AROUND TOWN

Scholarships to a leadership camp of the American Youth Foundation on Lake Michigan will be offered to one outstanding boy and one girl in the North Carolina High School State Club Leader I. B. Harris of N. C. State College has announced.

**My best friends were amazed ... at my improved Looks ... new ENERGY. Pep!**

**1—Promote the flow of vital digestive juices in the stomach**  
**2—Energize your body with RICH, RED BLOOD!**

THESE two important steps may help you overcome indigestion or constipation, nervous stomach, jerky nerves, headache, weight, weight, digestive weakness, weakness!

A person who is under 50 or only a few years past 50 should have only a stomachic dose of only 25 to 50 grains of S.S.S. Tonic daily.

**S.S.S. TONIC** helps build STURDY HEALTH

**Steps Used In Diagnosis**

Dr. Logan CLEMMING, M.D.

IN ORDER to explain the point of view of your physician while he is analyzing out the procedure of why he has found out what is the matter with you and what he had best do for you, let me go a little further into the subject of the history, which we discussed briefly yesterday.

The history, or as the physician calls it, the anamnesis, is the record of the patient's symptoms, past illnesses and hereditary background as the patient is able to explain it himself. Every physician worthy of the name not only obtains this history from his patient, but he makes a written record of it for his permanent files, to which is added the results of the physical examination and the different laboratory examinations.

**Divisions of Record**

The complete record of the patient falls into the following divisions:

1. History.
2. Physical examination.
3. Laboratory examination (microscopic and chemical examinations of urine, blood and other body fluids).
4. X-ray examination (if indicated).
5. Special examinations (such as the electrocardiographic examination of the heart, basal metabolism, etc.).
6. Treatment recommended.

We will discuss these headings in detail from time to time during the ensuing weeks. This is purely educational—an endeavor to make you acquainted and sympathetic with the mental processes your doctor goes through in trying to understand your case.

The history consists in several subdivisions. First, the purely statistical data: Your name, address, age, telephone number, social status and your occupation. Social status (single, married, divorced or widowed), occupation and age are really very important, especially age, because certain diseases are automatically ruled out at certain ages. Under social status you may remember that one of Dr. Conan Doyle's characters was famous for a monograph called "Obscure Nervous Lesions in the Unmarried." And occupation is notoriously related to disease.

The second subdivision in the history is "chief complaint." This is a guide-post because it states in the patient's own words the principal thing that he thinks is the matter with him. If he says "shortness of breath," it narrows the field. Whatever else your examination reveals, it must explain why the patient is short of breath.

The third subdivision of the history is called "present illness" and is an expansion of the chief complaint. The patient states how long he has been ill, whether his trouble has been continuous or intermittent.

**Past Illnesses**

The fourth subdivision of the history is "past illnesses," in which you try to find out whether anything in the patient's history could have been the cause and origin of the present trouble. Thus a history of rheumatic fever may explain a heart condition that exists even as much as 30 years afterward.

The next subdivision of the history is the family history. This is designed to find out whether there is any chance that the present disease is hereditary in nature. In practice this is the least satisfactory of the subdivisions of the history because few people know very much about their family history.

**"I never thought the time would come..."**

I never thought the time would come when it would be appropriate for me to say:

"Please don't ride on a Southern Railway train this summer—unless you conscientiously believe that your trip is necessary."

But that time has come... an inescapable by-product of our Nation's fight for Victory!

You see, the Southern serves the South—and the South is serving the Nation as the location of many important war industries going at top speed and more than half of all the larger training camps and military establishments in the country.

This means simply that our passenger facilities this summer will undoubtedly be strained to the limit.

Many of our passenger cars and locomotives will be assigned to troop movements.

Our regular trains and our stations are bound to be literally jammed with men and women in uniform, traveling under orders and on furlough and civilians traveling in connection with war work.

We're going to do our level best to handle this heavy load, including those civilians who conscientiously believe that they must travel.

But, until our trains and stations are no longer over-crowded by essential travel, we hope that you will patriotically forego all unnecessary travel over our lines.

I never thought the time would come... but it's here... and I know that we can rely on your cooperation and understanding.

*Ernest E. Norris*  
President
