

# Third Loan Is Discussed At Luncheon

## State Leaders Speak at Inter-County Group; Quotas Not Allotted Yet

Plans and proposals for putting over the third loan were discussed at a luncheon at the University of North Carolina today. The group, composed of representatives from various counties, discussed the details of the loan and the quotas for each county. The quotas have not yet been determined, but it is expected that they will be announced in the next few days.

John C. H. Smith, president of the University of North Carolina, presided at the luncheon. He stated that the third loan is a significant step in the development of the state's economy. He also mentioned that the state government is working to ensure that the loan is distributed fairly among all counties.

Mr. Smith also mentioned that the state government is working to ensure that the loan is distributed fairly among all counties. He stated that the state government is working to ensure that the loan is distributed fairly among all counties.

# Wheat Goal Set For State

## College Station, Raleigh, Aug. 18

The wheat goal for the state for 1943 has been set at 1,000,000 bushels. This goal is based on the current production and the expected increase in the next few years. The state government is working to ensure that this goal is met by providing the necessary resources and support to the farmers.

The state government is working to ensure that this goal is met by providing the necessary resources and support to the farmers. It is expected that the production of wheat will increase significantly in the next few years.

# Price Dispute Affects Labor

## meat to sell graded and tied tobacco at prices the same as or lower than paid for Georgia lease land.

The price dispute between the government and the farmers has led to a significant impact on the labor market. The farmers are demanding higher prices for their products, while the government is trying to keep prices low to ensure that the food supply is stable.

# 1943 Leaf Crop Is Estimated Below 1942's

## Raleigh, Aug. 18—Prospects for the North Carolina cured tobacco crop point to a crop of 35,000,000 pounds, approximately 10 percent less than last year's production, according to J. J. Morgan, statistician of the State Department of Agriculture.

The rainy period of early July caused a substantial loss of the crop, and the dry weather of the last of the month ripened the crop for a fast, light-weight leaf. The August 18 report for the state indicated a projected yield per acre of 965 pounds, compared with 1,062 pounds in 1942. Morgan said, "In the western part of the Old Belt, weather conditions have been fairly favorable, and crop prospects are promising. In the eastern portion of the belt, however, excessive rains in the latter part of the season have caused a substantial loss of the crop, and the dry weather of the last of the month ripened the crop for a fast, light-weight leaf."

The Bureau of Agriculture Statistics has reported that average leaf yield per acre in the U. S. declined about 2 percent between 1941 and 1942. The Bureau of Agriculture Statistics has reported that average leaf yield per acre in the U. S. declined about 2 percent between 1941 and 1942.

# UCC Denies Many Claims

## Raleigh, Aug. 18—A money penalty of \$6,063.50 was assessed against claimants for jobless insurance payments in one month recently, it was revealed today by W. R. Curtis, acting chairman of the Unemployment Compensation Commission. This sum represents benefits denied to worker claimants by the commission's 15 deputies because of voluntary quits, reductions of new work, or similar disqualifications under the law.

Although current claimants are very few, Curtis said, over 72 percent of the initial claims were referred to the deputies. In June, the first month in which such a total tally has been completed, the rate of such referrals in 1943 was 43 percent.

Acting under instructions to minimize claims for unemployment compensation in view of the present demand for all available labor, the commission's deputies examined 233 of the June claims and determined that 203 of the claimants were ineligible for benefits. 109 were subject to special conditions, and only 22, or 11 percent, were admitted to payments without disqualification. Under the unemployment compensation law, claimants who are subject to disqualification may forfeit payments for as many as 12 weeks. A claimant is disqualified for benefits if he has voluntarily quit work without good cause attributable to the employer, or he has failed to apply for or to accept suitable work when offered, or he has been laid off through a strike or a labor dispute, or he is subject to disqualification because of a conviction for a crime, or he has been discharged for misconduct connected with his work.

# Have a "Coke" = Aloha No

(WELCOME, FRIEND)

...or how to be at home in Hawaii

There are two ways to greet a friend in Hawaii. Aloha No, says the native, and have a "Coke", says the sailor. Both expressions carry the same note of welcome and affection. From Honolulu to Hartford Coca-Cola has become the symbol of the pause that refreshes—the gracious introduction between kindly-minded strangers.
