# Suffering Topic For Presbyterian Morning Sermon

"Lights in the Darkness" was the subject of the sermon at the First Presbyterian church yesterday morning. The minister, Rev. W. D. Melvin, dealt with the matter of suffering and pain as it relates to the Christian.

"What is this problem?" he declared, "the Bible attempts to describe and explain. Not in any systematic or dogmatic way, but in a way that is meant to be a help to the suffering and the one who is suffering."

The sermon was a powerful one, and the congregation was deeply moved. The minister spoke of the suffering of Christ and how it relates to the suffering of the individual Christian.

# OK... If I get enough SODA

AND HE means Soda...natural soda, the kind he's always used. He's got to grow more food and feed. He can do it if he gets enough soda to top dress his grain, fruit and forage; enough to side dress his corn, vegetables, potatoes, cotton and other vital crops.

Properly applied, 1 ton of soda top or side dressing will produce 250 bu. of oats, 100 bu. of wheat, or 125 bu. of corn; 12,000 lbs. of vegetables, 9,600 lbs. of forage, or 1,250 lbs. of cotton and 2,250 lbs. of cotton seed.

Last year 1,000,000 tons of Chilean Nitrate of Soda were used on U. S. farms. This year every pound that can be brought from Chile will be needed—and every pound possible will be brought in time for your '44 crops.
