HOW V-2 ROCKETS WERE LAUNCHED

TAKEN AT THE NAZIS MITTELWERK PLANT in Nordhausen, Germany, these two pictures reveal further secret details of the V-2 rocket bombs once made there. They show (left) an empty "launcher" and (right) the trailer with its rocket in position for firing. Tracked, the largest underground factory in the world, the plant was taken intact with hundreds of V-2 bombs in various stages of completion.

The President's Office At Potsdam. This is the office and library in the American quarters at Potsdam, known as "The Little White House," where President Truman will be kept busy when not attending the sessions of the momentous "Big Three Conference."

Wife Preservers. When you wear rubber gloves to protect your hands while doing rough work, sometimes water runs up the gloves and onto the arms when hands are lifted. To prevent this, turn the tops of the gloves back for about one inch, and in the fold thus formed put a ring of absorbent cotton. This will effectively catch any water which would otherwise run down your upraised arms.
