## Speedy Surrender Of Japan Is Goal Of New Ultimatum

Possible Entrance  
Of Russia Into War  
Impressed On Tokyo

Potsdam, July 23.—(AP)—A broadcast United States surrender ultimatum to Japan was viewed by many competent observers here today as a thinly-veiled warning to the enemy that Soviet participation—at least to some extent—in the Pacific is imminent.

The ultimatum, which was issued yesterday by President Harry S. Truman, was addressed to the Emperor of Japan and called for him to decide to send via the United States telephones a speedy surrender. President Truman's position now was squarely before the Pacific enemy as the big three conference entered its second week. Victory over Japan is the President's prime objective in this conference; Japan has been told that she must suffer the responsibility for her former hostilities when the time comes for postwar settlement.

Meanwhile, as the President met daily with Prime Minister Churchill and Premier Stalin, unofficial reports emanating from the conference announced that satisfactory progress was being made toward settling the many issues, such as Germany, reparations, boundaries and other problems.

The big three held a Sunday conference yesterday.

Whether the conference could be concluded this week was anybody's guess. The President is anxious to return to the United States promptly to report to Congress, and Churchill is anxious to be in London by Thursday for a report on the British national election.

There was every reason to believe that the conference was proceeding smoothly and harmoniously. Saturday's American announcement that much serious business had been transacted and the fact that there was a Sunday meeting seemed to indicate the statesmen were reaching final decisions as far as the foreign secretaries could clear the problems.

**TOKYO THREATENED WITH  
OF RUSSIA JOINING WAR**

Washington, July 23.—(AP)—Efforts to force the unconditional surrender of Japan through psychological as well as military pressure are heading for a climax this week.

Officials here confidently expect some sort of statement from the big three meeting at Potsdam to provide the maximum of pressure that can be brought to bear on the enemy at this time. The prospect is for a wind-up in Potsdam by Saturday.

Deeply involved in the situation is the possibility of Russian entrance into the war. Although a development which Tokyo long has sought to prevent by all sorts of diplomatic maneuvers, it is one which the Allied world seems fairly certain of unless the Japanese surrender before it can occur.

Evidently to take advantage of this situation, some United States agencies have been pressing vigorously a psychological warfare campaign on the point of what unconditional surrender would mean to the Japanese people. Despite this effort, and the recent waves of surrender talks which have accompanied it, military leaders are forcing ahead with plans for a war lasting at least until late next year. They gave little weight to the possibility of enemy collapse.

## Jap Lines Are Cut By China Unit

Chungking, July 23.—(AP)—Chinese troops, timing the pressure on the former American airbase city of Kweilin, have severed the main Japanese communication routes between Kweilin and Hunan provinces by reoccupying the large rail town, the Chinese high command said today.

The Chinese closed to within eight miles of Kweilin from the west. They also overran another town in 15 miles of Kweilin.

American Mustang fighters supported the attack.

Paiou, once an important Japanese stronghold 25 miles west of Kweilin, and the highway town of Ining, eleven miles west-northwest of the city, were among the places reported captured. The high command said Chinese moving northward along a subsidiary highway from Liuchow to Kweilin were approaching another former base of the U. S. 14th air force.
