BY LYNN NISBET,
Daily Dispatch Bureau

Raleigh, April 12.—Governor Cherry and a party of about thirty state officials and newspaper men returned to Raleigh late Thursday from a three day trip to site of the Standard Oil Company's test well at Hatteras, voting the trip a success. The fellows saw all they expected to see and then some and had experiences long to be remembered in getting to and from the most westerly outpost of Tarheelia.

COMBINATION—The trip had a twofold purpose, to see the actual operation of an oil well and to see the condition of the coast—especially the bulk of coast—near the center. Hatteras is well known to both parties as a beautiful beach, but the oil well operation was a new experience. The trip was a success, the fellows saw all they expected to see and then some and had experiences long to be remembered in getting to and from the most westerly outpost of Tarheelia.

MEETING—These commitments were made at a public meeting in the Buxton school house. The school had declared a holiday for the occasion and although most of the official party was late due to slow passage by boat from Vanceboro, the school auditorium was packed with students and adult residents. Having been apprised that an excellent seafood dinner awaited in another room, the speakers cut their part of the program short. At that, the housewife heard what they wanted to hear, though some were disappointed at lack of definite time limits for starting work. It was discovered that desire for better roads all the way up Hatteras island is not a new idea. Some of the students and historically peaceful common sense of the school would like to see a road built to the beach from Buxton. This is the first time that the school has been used for a public meeting.

ROADS—The students and Commissioners Evans wanted Governor Larkin to see what they needed in the way of roads on the governor's Highway Survey. Graham of the highway commission and several others came down the beach by way of Ocean Jet. The ferry there transported the cars and passengers across, but the governor and others were unable to get to the beach because of the rough water.

water in stride. The visitors were convinced that if anything is done about roads there are none now. It was pointed out that some 2,300 people on the island have no doctor or scientist, and are seriously handicapped about getting to church and school, getting the money crop of fish to outside markets and essential supplies in because of bad roads.

OIL—After the school house meeting the party was taken to the oil well to have drilling operations explained by the experts. While most of them didn't understand the technical terms they were impressed by the fact the hole they saw went down into the ground almost a mile and a half. Someone remarked that they might as well just go on through to Iran just as some of the oil Russia and Britain are looking about, then contributing to world peace and security. The oil well was a great success and it was pointed out that the money crop of fish to outside markets and essential supplies in because of bad roads.

TWINS MORE COMMON IN CANADA THAN U. S.

New York.—The birth of twins is more common in Canada than in the United States, according to a report by the Metropolitan Life Insurance Co. The report, based on a study of 100,000 births in the United States, shows that the frequency of multiple births is seven times that among white mothers.

ANNOUNCEMENT TO THE VOTERS OF VANCE

The 3rd Senatorial District of North Carolina is now composed of Vance, Warren, and Northampton counties with a combined population of almost eighty thousand. By agreement each county names the candidate each six years. It is now the time for Vance county to do so. The Senator so named will of course, not only represent these three counties locally, but will vote on questions affecting the entire State.

In offering myself as a candidate in the Democratic Primary to be held Saturday, May 25, 1946. I deem it proper to introduce the candidate to those many new citizens who have moved into Vance County. This is not done with any intent of self-praise but solely for the benefit of those who are not so well acquainted with the candidate seeking this high honor at their hands.

He was educated in private schools; graduated in High School; attended Horner Military Academy; attended the University of North Carolina; studied law at Wake Forest College; passed the law examination in 1921 and has been an active practitioner of that profession since then; is at this time President of the Vance County Bar Association, and a member of the State Bar Association.

Has been a member of the Red Men; Junior Order; Knights of Pythias; is a Methodist; married; four children; Voted the Democratic ticket the first time and has continued to do so since; been secretary to the Vance County Democratic Committee; been Chairman of the Vance County Executive Committee; a member of the State Executive Committee; member of Judicial Committee from the Third Judicial District; served as City Councilman of the city of Henderson; elected to the Legislature and served as a Member of the House of Representatives in the Special Session of 1936, the Regular Session of 1937, and the Extra Session of 1937. In the next few weeks through the medium of this newspaper I shall make clear my position on such public questions as labor, education, and agriculture.

I am not the candidate of any one man or group of men, and have promised nothing to any one. I am prompted to ask for the nomination at your hands from a desire to serve the people of this county and state, and I urge you to register and vote for me.

If given your active support I will surely appreciate it and will endeavor to vote "FOR" what I believe to be the desire of my constituents and "AGAINST" any legislation I believe to be adverse to their welfare.

Asking you for favorable consideration, I am,
Respectfully,
J. MERRILL PEACE

"WHAT'S IN A NAME?"
Was it home some other, it is to be expected that the First National Bank still would be preferred by its depositors.

To the entire personnel at the First National Bank, however, the word First has a peculiar significance and it keeps alive a peculiar aspiration.

The First National Bank aspires to be first in a service befitting its name. It seeks to be a public service institution of first importance and satisfaction to its depositors and to the section in which it operates. Its purposes, by its principles and policies, its with added prestige for, and to promote the integrity and standing of the banking profession. That, it feels certain, is the objective of all First National Banks.

To those who have come to feel that it is as wise to have a family bank as well as a family doctor or attorney, to turn to in an emergency, and who are about to make a bank's connection, the First National Bank desires to offer its resources, advantages and complete banking service.
