The sunshine and the shadow of the past
We will forget.

Our happy hours together, all too fleet; Your words of love, that stir me strangely yet;
The clinging arms; the kisses, tender sweet,
We will forget.

In future years the day may dawn at last When we may meet as ere we loved we met; When, lost in Lethe's wave, the happy past We will forget. And yet, oh, heart of mine, that throbs

The student of modern political economy, especially of American economics. as compared with the teachings of Adam Smith, Malthus, Ricardo, and John Stewart Mill, recognizes a wide departure from the old school economists, resulting from radical changes going on in the existing industrial system now pervading

There is a manifest growing tendency to eliminate competition as the controlling economic force, and, so far as possi-ble, to circumscribe the area within which its influence is effectual. There is an impelling cause behind this movement. the chief economic reason for which is claimed to be the concentration and conservation of energy with the least expense and competative waste-savings in the wages of officers, agents, travelling salesmen, and, above all, the expenses of competative strife. But the real cause underlying the formation of trusts and combinations is the advantages and opportunities which come through the concentration of large amounts of capital ually crush out all competition, thus givthe business for which the combines and trusts were formed.

NATURAL THAT THOSE AFFECTED ABUSE

It is but natural that the people mostly affected by the trusts should declain against and abuse them; but have not the organizers of syndicates simply adjusted themselves to present economic conditions, to avail of opportunities for personal gain, made possible under the politico-economic system now in vogue? There is a principle pervading all human nature, however civilized and cultured, that invites the individual to grasp all that is attainable and utilize every oppor-tunity for personal gain not interdicted by law. Many blame the organizers of trusts who would gladly themselves get into them, and "on the ground floor,'

THE TOBACCO TRUSTS. The tobacco trust, formed and forming, threatens the entire tobacco industry. Its influence has already proved so perni cious, hurtful, and obnoxious to the great mass of planters and dealers, and so threatening to all the manufacturers outside of the trusts, as to already paralyze the industry and cause th gravest fears.
