NO. 17.

VOL. XIV.

HENDERSON, N. C., THURSDAY, APRIL 18, 1895.

This May Mean Much for the State-The Experiments in Hop-raising Here Have Proved Most Satisfactory -Many People in the North Desirous Culture.

For several years hop growers in the North have been convinced that the South is better adapted for hop growing than any other section of the country. They have had their attention especially attracted to North Carolina. Mr. A. L. Jones, editor of the Hop Growers' Journal, Hamilton, N. Y., was among the first to become convinced of this fact and publish it to the world. So strongly convinced was he that hop growing could be successfully conducted in this section that he made several visits to the State for the purpose of making investigations in regard to our climate, soil and labor. The result of his investigations proved entirely satisfactory and he sold his paper in New York and has now moved to this State for the purpose of engaging in hop growing. He arrived in Raleigh last week and was seen by a reporter yesterday.

"Though the matter has been agiated in the papers of the State very dence with the agricultural depart-

A Business Man Wants to know the truth, the whole truth, and nothing but the truth. And he wants that He has no time to waste in skimming about the edges of a subject, he wants to get at the gist of the whole matter, and does not cars for a hundred pages of opinions if he can get It all in a hundred lines of soild facts. SENATOR SEWARD TALKED LIKE A SEER FORTY

YEARS AGO.

Country, the Isles of the Pacific and the Great Region Beyond-The Chief Theatre of Events in the World's Progress-Much of What He Said and the brazen gods must disappear. Has Been Realized.

[Wilmington Star.]

The New York Sun a few days ago published an extract from a speech delivered in 1852, in the Senate, by Wm. H. Seward, which in the light of events that have occurred and are now occurring, reads very much like a prophecy fulfilled. He was touching theirs? on the foreign relations of the United States, when he said:

Henceforth European commerce, European politics, European thought, and Euporean activity, although actually gaining force, and European connections, although actually becoming more intimate, will nevertheless relatively sink in importance; while the Pacific Ocean, its shores, its islands, and the vast region beyond, will become the chief theatre of events in the world's great hereafter.

The far-seeing scope and the boldness of this prediction will be the more realized when it is remembered that there was then little or no progress in
