 MAGNETIC NERVE TREATMENT
 This is a new and scientific method of restoring vitality to the nervous system. It is a safe and reliable method, and it is the only method that cures the nervous system.

COTTON STATES AND INTERNATIONAL EXPOSITION
 ATLANTA, GA.
 SEPTEMBER 18-DECEMBER 31, 1895

THE SOUTH'S GREAT FAIR.
 It Promises to Be One of the Finest Expositions Ever Held.
 At the point where Sherman thundered at Atlanta thirty-one years ago the Cotton States and International Exposition is fast taking shape, and by the 15th of September will have assumed proportions second to none in international enterprises of this character, excepting only the World's Columbian Exposition of 1893. This enterprise marks a turning point in the history of the southern states.

GOVERNMENT BUILDING.
 Architecturally Far More Handsome Than the Chicago Structure.
 The Government building will be of frame construction, covered on the exterior with shingles and clapboards and designed with a Romanesque motif. It is an imposing structure, with a total floor area of about 50,000 square feet. A central tower, 60 feet in width increases the height of the structure to 62 feet and produces the effect of a two-story building, and also assists in lighting and ventilating the interior.

OTHER BUILDINGS.
 All will be attractive, and some of them really grand.
 In addition to the Government building, many others have been accepted and work commenced on the following:
 Machinery and Liberal Arts... 10,000 sq. ft.
 Forestry and Minerals... 10,000 sq. ft.
 Fisheries and Aquaculture... 10,000 sq. ft.
 Agriculture... 10,000 sq. ft.
 Horticulture... 10,000 sq. ft.
 Poultry and Livestock... 10,000 sq. ft.
 Fisheries and Aquaculture... 10,000 sq. ft.
 Fisheries and Aquaculture... 10,000 sq. ft.

THE WOMAN'S BUILDING.
 The design of the Auditorium and Administration building has not been completed, but it is intended to have a structure which will combine the purposes of an auditorium and administration offices. The contour of the surface is such that this can be nicely arranged at the main entrance fronting the Fourteenth street. The designs which have been submitted so far are of classic style, a two-story building opening with a portico and high Tuscan columns. Through this colonnade the entrance to the Auditorium is effected. This hall will seat about three thousand people, and here the different congresses and conventions, many of which have been arranged for, will be held. Upstairs elaborate provision will be made for all the departments of administration.

THE FIRE AND POLICE BUILDING.
 Plans have been ordered for a building to accommodate the fire and police departments. This will be a handsome structure, thoroughly supplied with the best apparatus that has ever been devised up to date. For fire protection the Gamewell fire alarm of the most improved type will be installed, and to make it more thorough efficient an auxiliary alarm system, covering every part of each building, will be added. Alarm boxes will be stationed near each exhibit and will register the exact locality at headquarters, so that the

THE FIRE AND POLICE BUILDING.
 Plans have been ordered for a building to accommodate the fire and police departments. This will be a handsome structure, thoroughly supplied with the best apparatus that has ever been devised up to date. For fire protection the Gamewell fire alarm of the most improved type will be installed, and to make it more thorough efficient an auxiliary alarm system, covering every part of each building, will be added. Alarm boxes will be stationed near each exhibit and will register the exact locality at headquarters, so that the

have a frontage of 245 feet with a depth of 100 feet. The center part front facade will be 50 feet high, and the two side wings will be 35 feet high. The exterior has been designed after the Renaissance, and the style is the Italian renaissance. The columns forming the colonnade on the east and west front are 3 1/2 feet in diameter and 35 feet long, fluted and having capitals designed in the Italian renaissance. In fact all the ornamentation throughout the entire building is in Italian renaissance, slightly tending to the Florentine school.

STATE EXHIBITS.
 Will Be One of the Leading Features of the Great Fair.
 The state exhibits will constitute one of the most important and interesting features of the great fair. Prominent among these will be the Georgia exhibit, installed in a handsome building near the Fourteenth street entrance. Near by will be another of Florida-Florida covering a large space. The Florida exhibit, besides embracing displays of all the products of the state in detail, will be employed for numerous exhibits of the great railroad system, penetrating the peninsula. The plant system, for example, will erect a pyramid one hundred feet square at the base and fifty feet high. The Flagler system will be handsomely represented with special exhibitions, as will also the Louisville & Nashville and the Jacksonville, Tampa & Key West railroads. South Carolina will furnish one of the best and most attractive of the state exhibits. This will not be done with state funds, but very efficiently by private means, raised through a very thorough organization extending to all the counties. The Commercial club of Charleston has been the agent, and the governor has cooperated by ap-

BIRD'S EYE VIEW OF COTTON STATES AND INTERNATIONAL EXPOSITION.
 play, as Atlanta is favorably situated with reference to the sources of supply for marine and fresh water fish and other animals, as well as plants. The beautiful tropical and subtropical fishes of the Gulf of Mexico can be readily obtained and as easily kept in perfect condition during the exposition. Commissioner McDonald has decided to make a special effort to show the important game and food fishes which the Gulf of Mexico can be readily obtained and as easily kept in perfect condition during the exposition. Commissioner McDonald has decided to make a special effort to show the important game and food fishes which the Gulf of Mexico can be readily obtained and as easily kept in perfect condition during the exposition.

MUSICAL FEATURES.
 No Expense Will Be Spared to Make Them Perfect.
 The finest orchestras of America have been engaged for the exposition. It is the policy of this department to secure in succession a number of the most celebrated musical organizations. Gilmore, Sousa, and Innis' bands have been engaged. A succession of orchestras will be engaged in preparation, and some magnificent spectacular accompaniments will be produced. Under this head will come the chime of bells—the largest ever erected in America. A tower many feet high will be erected on the highest point of the grounds, near the Government building and Art palace, for the accommodation of the largest chime of bells ever exhibited in America. A full chime of thirteen bells will be placed on the top of this tower, and their sweet melody will be heard echoing through the hills of middle Georgia for miles around.

AMUSEMENT FEATURES.
 The Fair Will, of Course, Have a Well-Fledged Midway.
 The Midway Plaisance is to be re-located here with many additions and improvements. Hagenbeck is coming with his animal show; there is to be a Cairo village, Chinese and Japanese villages, a German village, a Mexican village, a Guatemalan village and sev-

eral other ethnographical exhibits that are not seen at Chicago. The amusement features to be most extensive, also, than were at Chicago, with plenty of music and motion and merri-ment.
 Concessions which are not easily regulated and upon which the percentages would be difficult to collect are to be sold outright at auction, with a minimum price and a space rental for the number of square feet occupied, while the percentage plan is to be applied only to such as charge an admission fee. The soda water fountains are charged \$1.00 each, and the sausage and coffee pavilions the same. The popcorn and peanut vendors must pay at least \$200 each; the confectionery stands the same; souvenir spoons, \$50 for each stand; hot waffles and griddle cakes the same; games and chewing gum, \$250 each, and in proportion.

TRANSPORTATION.
 Arrangements for Reduced Rates Already Completed.
 The department of transportation has been organized with a veteran railroad manager at its head, and arrangements have been practically completed with the transportation lines of the United States, Canada and Mexico to bring exhibits and visitors to Atlanta at reasonable low rates. Exhibits which pay full freight coming and remain unsold will be returned free of charge. Throughout a large part of the United States a rate of one cent per mile each way will be put on, and it is probable that from the most distant points the rate will not exceed one fare for the round trip.
 Liberal concessions have been made by the ocean steamship companies, embracing a number of the trans-Atlantic lines plying between New York, Baltimore and the ports of England and the continent of Europe. The Pacific Mail Steamship company has agreed to transfer free of charge all exhibits from points in South and Central America reached by its lines, and will make liberal reduction in fares to government officials or other visitors from those countries.

EXPOSITION SITE.
 Easy of Access from All Parts of Progressive Atlanta.
 Piedmont Park, located two miles from the Union depot (the center of the city), has been adopted as the site for the exposition. More than \$300,000 has already been expended in heightening the varied and interesting landscape, and \$150,000 more will be expended by the management of the exposition in further projected improvements, which will make the already beautiful grounds an artistic triumph of landscape architecture. Great inland lakes twenty acres in area have been constructed, and with few exceptions all the buildings will have water frontage. On these lakes electric launches and gondolas will ply, affording an agreeable mode of transit from one part of the extensive grounds to another.
 The Atlanta Exposition will be something that no one can afford to miss.

CUSTOMS ARRANGEMENTS.
 Foreign Exhibitors and Their Interests Well Protected.
 By act of congress foreign exhibits will be admitted to this country free of duty, if unsold, and the exposition grounds and buildings will constitute a bonded warehouse for such goods. In case exhibits or duplicates of exhibits of imported goods are sold, customs officers, with offices on the grounds, will be on hand to collect the duty and release the goods without delay.
 The leading transportation lines are bonded from the principal ports to Atlanta, so that exhibits coming from abroad will come in bond to Atlanta, be installed, and remain in bond until they have been returned from whence they came. The Southern railway is bonded from Atlanta to New York and Brunswick; the Seaboard Air Line from Atlanta to Norfolk and Baltimore; the Central and South Carolina railroads in connection are bonded from Atlanta to Charleston and Savannah. The Southern Pacific lines are bonded from San Francisco to Atlanta.
 \$100 Reward \$100.
 The readers of the GOLD LEAF will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is exanthema. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer one hundred dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. CROWEY & Co., Toledo, Ohio.

ACCOMMODATIONS.
 The Company Will Furnish Addresses of Hotels and Boarding Places.
 Atlanta is a city of one hundred and ten thousand people, and the calculation is that on great days she will have to take care of that many more. The committee in charge of public comfort, after careful consideration, has decided to adopt the system which was operated with such success at Philadelphia during the centennial. The control of this business will be held by the Exposition company, and not as a concession, as at Chicago, where a charge was made for parties filling rooms. At Atlanta absolutely no charge will be made either to hotels, boarding-houses, residents or visitors for this service. An elaborate canvass is being made of the city and the suburbs, and every available room will be registered. The same work will be carried through the outlying towns for a distance of thirty or forty miles, and commutation tickets will be put on by all of the roads, so that visitors seeing the fair during the day will be able to get to the city in the evening and return early the next morning. This will materially expand Atlanta's surface for accommodating visitors. All this information will be tabulated and sent broadcast over the country, and visitors from a distance will be encouraged to engage quarters in advance. In this way much of the work of public comfort will be done before the exposition opens. During the exposition the public comfort headquarters will be opened at some central point in the city, and active and experienced men will be placed in charge. A corps of messengers will be constantly in waiting, and every house on the list will be visited twice a day and every vacant room will be reported. The managers of the bureau will be able to tell at any time exactly how many rooms are open, and in what locality. In short, the public comfort bureau will run the city very much as a hotel is run, only bicycle messengers will take the place of bellboys.

A FERTILE SECTION.
 The Piedmont Region and the Great Cotton States.
 Atlanta is the center of the unsurpassed agricultural and mineral quadrilateral forming the southeastern section of the Union. Within a radius of 100 miles of Atlanta there is a greater variety, and in some instances a greater abundance of mineral products, than any other city in this country, if not in the world, and the whole territory contiguous to Atlanta is richer in variety and extent of minerals, fossils and agricultural products than any of the countries of the world.
 The region from which the Cotton States exposition takes its name is one of the most fertile and productive in the world. Its farm products equal in value the entire production of the United States, and its manufactures, now in their infancy, are sufficient to pay for all its imports into the country. This great region, stretching from the Atlantic to the Mississippi, and from the Potomac to the Gulf of Mexico, has more seaboard than any country in Europe, and several times more than any other geographical division of the United States. While thus it is broadly in touch with the world by water, its inland transportation is excellent and extensive. The Mississippi river, which, with its tributaries, affords 45,000 miles of navigation, equal to one-fourth of the railway mileage of the United States, finds its greatest usefulness and heaviest traffic in the cotton region.
 The Ohio, the Tennessee, the Ocmulgee, the Cumberland and the Coosa, the Arkansas, the Alabama, the Chattahoochee, and the Savannah, all a number of minor streams, carry a large part in the traffic of the southern states; coupled with this is a railway service far beyond the limits of population in efficiency, offering fares and freights lower in proportion to the volume of traffic, than in any other country.
 CAPABLY MANAGED.
 The Director General Has Almost Completed His Work.
 There is a small board of directors, who meet daily, and the authority of Mr. Collier, the director general, is almost unlimited. The committee on finance control expenditures and audit their own bills. Mr. Collier is a bank president and a young man of great force and executive ability, and is assisted by the leading business men of Atlanta. Authority is more centralized than it was in the Chicago organization, and there is not nearly as much circumlocution or red tape. Each branch is under the control of an individual, who has final power.
 The department of publicity and promotion is in charge of Mr. W. Cooper, an experienced newspaperman, who understands his business and is allowed much latitude.

MAKES CHILDREN AS FAT AS PIGS
TASTELESS CHILL TONIC
 IS JUST AS GOOD FOR ADULTS. WARRANTED. PRICE 50 CENTS.
 GALATIA, ILL., NOV. 10, 1894.
 Mrs. M. J. T. Barber, prominent newspaper man of La Crosse, Wis., was taken with cholera morbus very severely. The night clerk at the hotel where he was stopping happened to have a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy and gave him three doses which relieved him and he thinks saved his life. Every family should keep this remedy in their homes at all times. No one can tell how soon it may be needed. It costs but a trifle and may be the means of saving much suffering and perhaps the life of some member of the family. 25 and 50 cent bottles for sale by Melville Dorsey, druggist.

Nerves Unstrung
 Work, No Appetite, Hood's Sarsaparilla Restored Health.
 "Three years ago I had the grip, which settled in my head. It continued to grow worse and there was no rest for me. My limbs felt numb, my nerves seemed to be unstrung, and I had no appetite. Doctors' treatment and other remedies failed to do me any good. I obtained two bottles of Hood's Sarsaparilla, which

Restored Me to myself. Last July I began to have bad symptoms, and I at once resorted to Hood's Sarsaparilla. I continued until I had taken three bottles, which not only restored my health but also cured my baby of a bunch and did him a great deal of good. Mrs. EMERY A. RAINY, North Danville, Va.
 Hood's Pills are purely vegetable, carefully prepared from the best ingredients, etc.
