> > American Valeta

There is a new order of things among the gilded youth of today, and the vale is in demand. This demand has led to the establishment in Boston of a finishing academy for gentlemen's serv-

ants. Here the gentleman's gentleman learns all that is necessary for him to know. The first thing that is done to a matriculate is to cut his hair in the approved English fashion and make him clean shaven, or at least reduce his hirsute appendages to a modest "mutton chop" just forward of his ears. He is then put in livery and made to speak only in an h-less English dialect. The various courses of instruction include training in all the branches of menial work, and when a pupil is sent out into the world he is given a certificate of proficiency in his particular course. One of the features of the course is the daily practice in immobility, which consists in standing for half an hour a day between two upright bars so regulated that they touch the man's toes and breast bone in front and his coattails, shoulder blades and hat rim at the back. This gives the requisite wooden rigidity and is practiced by all pupils. Those

whose physiques are lacking or too lux-It seems that at one time when Enguriant are reduced to the proper form by lish lawyers wished to procure witnessvigorous exercise. -Boston Letter. es with elastic consciences, or men A Lamp In His Pocket. Not very many men carry lamps in their pockets, but there is at least one man who does, and that is the lamplighter on the elevated road. It is an alcohol lamp, like a section of brass cylinder, five or six inches long and an inch through, and with a slender tube two or three inches long, holding the lighter comes in at the front door of th car with his lamp lighted. With a rapid ease acquired by experience he lights the six lamps, seeming almost not to
