### NO LOVE FOR THE NEGROES.

IN THEIR COMMENTS Anent Restricted Suffrage in the South

that the comments of the Republican in the old cry of human rights and press and politicians of the North on negro disfranchisement in the South are, as a whole, couched in very

moderate tones. This is not less significant than the one of sentiment here, which practically is in thorough sympathy with the movement. \* \* One constantly hears its leading representative men admit, "We would be very sure to do the same thing under the ame circumstances." Of course this s not said for publication and these centlemen would be very quick to dislaim any such expressions if invested with their personal authority. (Washington Post.)

The Democratic party can well rest content with the presentation of the issue of imperialism made by Mr. Bryan in his speech at Indianapolis. It is the most complete and logical

If any evidence were needed to prove Mr. Bryan's ability, it is amply found in this address. In 1896 he was so thoroughly saturated with the the reputation of being a man of one idea only. His persistent and sucplank in the Kansas City declaration strengthened this view of his character. It was felt that although the platform asserted imperialism to be the paramount issue, Mr. Bryan would not be able to divorce himself from his favorite subject, and that the money question, after all, being the one with which he was most familiar, clusion of all else. The falsity of this belief is shown by the admirable mantion is so well understood as to render

It is, we admit, generally an easier fault-finding comes naturally to the human mind. At the same time, there is captious and foolish criticism, and, on the other hand, there is dignified and sensible argument. Mr Bryan's speech is on the latter plane. He has not descended to the level of the politician, but discusses what he believes to be a great danger to the republic with calmness, clearness and force. He explains and defends his support of the ratification of the treaty of peace with Spain by saying that he expected favorable action would end the war, release the volunteers, remove the cause for military expenditures, and bring independence

he was mistaken, the defeat in the Senate of the Bacon resolution, which promised independence, being evidence that the Republican party was determined to keep the Filipines in a state of subjection. In this connection, he repeats the well-known argument that the inhabitants of the Philippine Islands, if the latter are retained as a part of the United States. must either be subjects or citizens. If they are to be subjects, the Republican party has entered upon a policy of imperialism. He finds nowhere, in any Republican speech or party declaration, any evidence that the

and acts of Southern Democrats, or rather Southern white men, for in the are synonymous. The remarkable thing is that the

people of North Carolina were so slow in moving for the elimination of the ignorant negro element from our politics and that they should have patientborne with it so long. Having borne with it so long it is doubtful if they would have moved even when they did if it had not been for the way the fusion managers pandered to the negro vote, and the way they recognized that vote in the distribution of offices in the Eastern counties, which aroused the white people to the impending danger of negro domination in the East and the necessity of doing

something to avoid it, when a Democratic Legislature had the power to give the people an opportunity to act. With such unscrupulous tricksters as Marion Butler and Jeter Pritchard planning and plotting to hold their grip, and working upon such an element as the ignorant negro, with an ignorant white contingent, as are led by revenue officers. deputy marshals, etc., there was no telling what might happen and what the fate might be if those Eastern counties having large negro populations and therefore supreme effort became necessary to prevent the success of these tricksters, with possible and probable negro domination as a result of their success.

The white people of North Carolina saw the danger and wisely and patriotically they confronted it and averted it, not only for the present, but for all time, because "revolutions never go backward."

They did practically what the people of any Northern State would have done if they had had a taste of negro domination or stood in fear of it. They would not have patiently submitted to the conditions for thirty years as the white people of North a thousand of the people up there, re- risks placed to best advantage. gardless of politics, who gives the contest in this State a thought who does not approve the action of the white men of North Carolina in climinating the vicious and ignorant negro element from our politics, thus in-suring the rule of the white man.
