# THE GOLD LEAF.

ESTABLISHED 1881.

-BY-

THAD R. MANNING.

THURSDAY, JANUARY 24, 1907.

WE predict that the bill introduced in the Legislature by Senator Kluttz affecting shyster lawyers, will not become a law. There are too many lawyers in the Legislature.

Douglass of Wake, has introduced as many bills in the Legislature as Roosevelt has sent special messages to Congress. But strenuous and imonlsive as the President is no one has accused him of being a crank.

WE are so much governed by law now that after awhile it will be necessarv for a man to have some sort of special permit to kiss his wife on his own premises. A bill has been intro duced in the Legislature to allow owners of stock to salt same whereever found in Graham county.

The Bickett bill is a very good bill but it does not go far enough. An amendment should require the author of a bill to father it. The lobbyist gets in his work in more ways thanone. When a bill is introduced "by request" the name of the person who inspired it should be given.

The Lanston Monotype Machine Company, through Wood & Nathan, No. 1 Madison Avenue, New York, send out a handsome calendar for 1907 which is interesting from the fact that with the exception of a single line, the whole work, type and borders alike, was done on this marvelous machine. It needs to be seen to be appreciated, and printers of all others can best appreciate it.

Much braving betrays the presence of some of the long-earned lustylunged kind in the present Legislature as well as previous ones.

Is it to be a three cornered fight for the senatorship two years hence? Those aspirants who are anxious to succeed Senator Overman had as well make up their minds to be content to let present conditions remain until 1915.—Wilmington Messenger.

We do not believe present conditions would be bettered by a change -and if nothing is to be gained then why make it? Senator Overman fills his position with distinguished credit | The Exchange of Advertising for to himself and the State, and if h continues to do as well and retains his strong hold upon the people there will have to be a great change in public sentiment before there will be a change in Senators merely because some other person wants the berth

# To Encourage Short Story Writing.

It is gratifying to note that the North Carolina University takes the lead in a movement to encourage short story writing in the South. The prizes for this contest will be some incentive to college men to try their hand at writing, although the prizes should be twice the amount. The contest between the colleges will be confined to the students. but we have no doubt if some movement were set on foot outside of college circles for the encouragement of literary pro duction, we would be astonished at th result. When we make it worth while for people to write we are liable to discover more than one genius in the South.

-Wilmington Star So far as we know, this idea is strictly original; certainly it is in the South. But aside from that, and a should take the lead in such matters, the purpose is one well worthy of pursuit and merits allencoragement, The only way to learn to write is to write, and if the South is ever to take a stand in the world of literary productivity more inducements and encouragements must be offered to beginners. The colleges and universities are best prepared to blaze the way, as they have been doing. And by inter-collegiate contests they may go far toward removing the erroneous impression that athletics, because most talked of in newspapers, is the branch most emphasized.

### Compying With the Pare Food and Drug Law.

We are pleased to inform our patrons that among the many advertisers in the columns of our paper, none have shown so earnest an attitude toward carrying out strictly th provisions of the Pure Food and Drug Act of June 30, 1906, which went into effect Jan. uary 1st. 1907, as the Pineule Medicine Company of Chicago. The preparations of their manufacture contain no opiates or poisons of any kind. They are simple household remedies prepared by them from pure drugs and with absolute uniformity.

Among other ready selling articles of their manufacture are to be found the well known cough syrup. Bee's Laxative, containing Honey and Tar, Dade's Little Liver Pills. Pine Salve, Pineules for the kidneys, Ring's Dyspepsia Tablets and Man Zan Pile Remedy. ously, we think, is an infringement We commend the attitude of this concern and believe that the public will appreciate of the right of contract, and this is their early announcement regarding the one of the fundamental principles of preparations of their manufacture.

# Transportation.

Inder a recent ruling of the Interstate Commerce Commission, construing the new rate law, the right has been taken from the newspapers and the railroads to make contracts with each other for the exchange of advertising on the part of one for transportation on the part of the other. Many well informed lawyers are of the opinion that the new law admits of no such construction, or that such a construction was never contemplated by its framers, and several of the railroads, the Monon particularly, have announced that they will continue to make contracts with newspapers as usual, and have made up a test case for the courts. It is yet to be seen whether the

United States Supreme Court will sustain the Commission, but it is not believed that it will do so. The rule, as heretofore upheld and stated by the various courts, is as follows: "What the parties agreed shall constitute the payment, the law will

adjudge to be the payment. It is competent for parties to designate by their contracts how and in what natural pride that our State payment may be made. It is by no means true that payment can be only made in money; on the contrary, it may be made in property or in services." "The inhibition," they added, against charging a "greater or less or differentt compensation,' relates alone to a difference in the "established rate," and not to the manner of making payment. There have already been intro-

duced in both the United Sates Senate and the House of Representatives bills to allow such an exchange of business between the nswspapers and the railroads to apply in case the construction of the present law is upheld by the Supreme Court. The newspaper people do not ask

for any special favors-let there be no misunderstanding here. They only demand the right of contract, which seems to have been taken from them. They have space to sell, and the railroads have transportation to sell. The newpaper man wants transportation, and railroads want advertising. If they are willing to exchange commodities on a basis satisfactory to both, it is but just that they be permitted to do so. How is any one else harmed or affected in any way deterimentally? The construction of the law, erronelaw and liberty.

Of course the above ruling refers only to inter-State transportation. This cannot affect contracts which refer to transportation within the bounds of each State. However, there has recently been introduced in our State Legislature, in the Senate by Mr. Graham and in the House by Mr. Justice, bills which are designed to accomplish the same purpose as the federal law. The same argument, of course, applies. The newspapers do not want free passes, but they do want the right to sell their advertising space to the rail-roads and take transportation in exchange therefor on such terms as they may agree upon. This is all there 's in it, and we appeal to any fair-minded man, interested or disiterested, as to the justice of this

position. We cannot believe that the members of the Legislature will endorse this proposition to deprive the newspapers of the right to make contracts with the railroads for transportation. The right should be conceded them, as it is under the present

law, to make their own contracts without interference from any source. The law in this State as it stands at present was recommended by the by a unanimous vote.
