Do You Want to Know

What You Swallow?

There is a growly a settiment in this country in favor of MEDICINES OF KNOWN er menerition. It is but hathral that its should have some interest in the compsite n of that which he or she is expected to swallow, whether it be food, drink or medicine

Recognizing this growing disposition on the part of the public, and satisfy that the fullest publicity can only add the well-earned reputation of his med cines, Dr. R. V. Pierce, of Buffalo, N. Y. has "taken time by the forelock," as it were, and is publishing broadcast a list of all the ingredients entering into his leading medicines, the "Golden Medical Discovery" the popular liver invigorator, stomach toric, blood purifier and heart regulator; also of his "Favorite Prescription" for weak, over - worked, brokendown, nervous and invalid women.

This bold and out-spoken movement on the part of Dr. Pierce, has, by showing exactly what his well-known medicine are composed of, completely disarmed alharping critics who have heretofore un-justly attacked them. A little pamphle has been consoled, from the standard medical authorities of all the several schools of practice, showing the stronges resonants by leading medical writer he several ingredients which enter int. In Pierce's medicines. A copy of thi litte book is malled free to any one desiring to learn more concerning the valuable, native, medicinal plants which enter Into the composition of Dr. Pierce's medicines. Address Dr. Pierce as above.

Greensboro Industrial News. On the thirteenth of the current month President W. W. Finley of the Southern Railway, delivered an address in Atlanta to the representatives of the freight and passenger departments of that railroad upon various phases of their duty both to the company and to the public.

Among other matters President Finley laid great stress upon the fact that the interests of a railroad and the public which it served were identical and insisted that the representatives of the railroad give "considerate treatment of every one having business with the road."

My personal experience convinces me that the people as a rule are fairminded and when fully informed can be relied upon to deal justly with the transportation interests.

We are certainly glad that the head of the largest railroad system in the Southern States looks upon the matter in this way and we trust that he will impress upon all of his subordinates the fact that no railroad, or any other corporation for that matter, can hope to succeed by a policy
