SUBSCRIPTION \$1.50 Cash.

The Knock-out Blow. The blow which knocked out Corbets was a revelation to the prize fighters. From the earliest days of the ring the knock-out blow was aimed for the jaw, the temple or the jugular vein. Stomach junches were thrown in to worry and weary the fighter, but if a scientific man had told one of the old fighters that the most vulnerable spot was the region of the stomach, he'd have laughed at him for an ignoramus. Dr. Pierce is bringing home to the public a parallel fact; that the somach is the most vulnerable organ out of the price ring as well as in it. We protect bur heads, throats, feet and lungs, but the tolk had been are utterly indifferent to, until disease finds the solar plexus and knocks us out. Make your stomach sound and strong by the use of Doctor Pierce's Golden Medical Discovery, and you protect yourself in your most vulner.

"Golden Medical Discovery "weak stomach," indigestion, or dyspepsia, torpid liver, bad, thin and impure blood and other diseases of the organs of digestion and nutrition. The "Golden Medical Discovery " has a specific curative effect upon all mucous

surfaces and hence cures catarrh, no matter where located or what stage it may have reached. In Nasal Catarrh it is well to cleanse the passages with Dr. Sage's Catarrh Remedy fluid while using the "Discovery" as a constitutional remedy. Why the "Golden Medical Discovery" cures catarrhal diseases, as of the stomach, bowels, bladder and other pelvic organs will be plain to you if you will read a booklet of extracts from the writings of eminent medical authorities, endorsing its ingredients and explaining their curative properties. It is mailed free on request. Address Dr. R.V. Pierce, they contain not a drop of alcohol, pure, triple-refined glycerine being used instead. Dr. Pierce's great thousand-page illuscent stamps, or cloth-bound for 31 stamps. Address Dr. Pierce as above.

A Vast Advance in Farming.

Referring to the opening of the A and M. College at Raleigh nineteer years ago Prof. Massey says: "Looking back to nineteen years ago when we opened the Agricultural and Mechanical College in Raleigh we see that there has been a vast advance and that the advance in farming is largely the cause of advancement in other lines. We hope to keep the ball moving.

It is a plain and accepted truth that there has been a great advance made in the agricultural pursuits in-North Carolina in recent years. Twenty years ago it was the exception in this State to gather a bale of cotton to the acre. Now it is the rule; and while this is true the yield of corn per acre has been greatly increased and all other farm products

Of course some progress would come in these respects from the plodding and experimenting of time. But it is due to the A. and M. College and the men that it has equipped; the Experiment Station and the knowledge that it has disseminated; and the work of the agricultural department at Raleigh and the agricultural journals, especially the Progressive Farmer, that this accelerated progress in farming has come about in North Carolina. Hence the duty and self-interest of the agricultural class to patronize, support and uphold all

Caution Should be Exercised in Eating Canned Goods.

of these intitutions.
