Old Fashioned Courting.

"Courting?" Why, bless you, my boy, the young fellows of today do not know the meaning of that word! When a young man would walk five or even ten miles through the snow or rain and mud, freeze his ears and ingers, and face the danger of wildeats, to see his girl, and that too in the general living-room with the family, he was entitled to admit that he was courting. And that was the rule, not the exception. The young fellows would start out Sunday afternoon to see their sweethearts, and no weather was too bad to keep them home. It might be too cold or too muddy to take out a horse; but in that case he would go on foot, and he would go through as much hardship to see his girl as did knights of old to rescue fair maids in castles bold. But it was his devotion, his ourting; and when he won that girl ie stuck to her through thick and thin, through good report and evil report, obeying the Scriptual injunction that what God has joined together no man should put asunder. There were no marriages of convenience and few hasty marriages then. The courting was long and there were no divorces to follow. The young people might meet often at the singing-school, or the dance, or the husking bee; but these did not take the place of regular courting. The courting was on Sunday night

Practical Education.

One branch of practical education at the modern colleges is furnished by the students of the Virginia Polytechnic Institute in manning "exhibition cars" provided by the railroads. One such car is now out on the Virginian Railroad, accompanied by V. P. I. professors and students, who are giv-ing demonstration work to the farm-ers along the line of that road in Virginia. The train consists of three box cars and a Pullman. The box cars are fitted up with exhibits, the most interesting of which is a living dairy department, in which the cows are on hand to be milked, and in another car the churning and cheese-making apparatus is on exhibit to show how the thing can be done in short order. What Your Opinion Is Worth The third car is a kind of general show of what can be done in the way of economizing in farming and increasing the profits of the agricultural layout with twentieth century it, and let a friend taste it, you will like it, so will he. If YOU don't, box it up, ship what is left back, get ALL betterments added. The farmers attend the demonstrations in large numbers and the result is bound to your money and we will pay the carry-ing charges both ways. This is where be an improvement in Virginia dairyng and agricultural conditions.
