

Women's Pains

"I was a total wreck," writes Mrs. Beulah Rowley, of Champoeg, Oregon, "from pains I had suffered, for 4 years, every month. Sometimes I would be unconscious for 12 hours at a stretch. I did not know that anything could stop the pain entirely, but Wine of Cardui did. I advise all women suffering with painful periods to use Cardui and be relieved."

It does this by regulating the functions and toning up all the internal female organs to health. It is a pure, specific, reliable, female remedy, with a record of 70 years of success. It has benefited a million others. Why not you? Try it.

WINE OF CARDUI

McClintock on Stock Market Opened Weak

Greensboro, Oct. 12.—The noted case against Percy G. Fonville, charged with complicity with Franc Jones in defrauding the Charlotte National Bank of funds, was again taken up this morning.

Mr. W. B. McClintock, who keeps the individual ledger accounts in the Charlotte National Bank, was again called to the witness stand, and was kept telling his story and answering questions until 1 o'clock this afternoon, when a recess was taken until 3 o'clock. At this hour the case was again resumed, according to an agreement of counsel and Judge Boyd.

Comparatively little was accomplished at the hearing.

Mr. McClintock made a most excellent witness, going over the ledger, showing deposit slips made by Fonville, and tracing each date corresponding with the fifteen counts in the bill of indictment. He specified several of the false entries made by Franc Jones from when they began in November, amounting first to about \$1000. He showed that they gradually increased until March 15, 1907, when they amounted to \$8,000.

Deposit slips in Jones' handwriting to Randolph & Co., of Philadelphia, were shown. Also deposits from Fonville, the largest amount being \$4,000 in one day, although the checks were never entered.

Witness told of Jones and Fonville entering the bank together on March 15th and of Jones going to the vault. On that day the books showed Fonville's and Randolph & Co.'s accounts drawn out. The witness was not allowed to tell what they said.

Witness stated that he had never suspected Jones. In detail, the witness showed false accounts of Jones and an effort to connect Fonville with Jones was made.

UP AND DOWN.

From Life.
When Belle Fortune tackles men,
We're higher, thither hurled;
And then 'tis said of certain folks,
World!

in
They're way up

But others, not so lucky in
This buffeting about,
Are thus described in pointed phrase,
"Poor things, they're

down
and
out!"

Pettibone Trial to Begin.

Boise, Idaho, Oct. 14.—Everything is in readiness for the trial of George A. Pettibone, the second of those charged with complicity in the murder of former Governor Steunenberg to face the bar of justice. It is believed that the Pettibone trial will be comparatively short and the indications are that it will not attract anything like the widespread attention that centered in the case of William D. Haywood, the secretary of the Western Federation of Miners, whose recent trial on the same charges resulted in his acquittal.

Davidson Students Come to Hear Bryan

Davidson, Oct. 14.—A large number of Davidson students left today for Chicago to hear William J. Bryan. General permission was given and all these who could go were allowed that privilege.

Supreme Court Meets.

Washington, Oct. 14.—The supreme court of the United States began the October term today with all members present. The session lasted 36 minutes.

What probably troubles Taft most is the sad realization that the Japs can't vote.

FOR THE BETTER UTILIZATION OF OUR YELLOW PINE

Washington, D. C., Oct. 12.—"In fifteen or twenty years, at the present rate of cutting, the supply of the long-leaf yellow pine of the south, one of America's most useful forest trees will be nearly exhausted," say the experts of the United States Forest Service. If these pine forests are wiped out one of the south's important industries will die—the production of so-called naval stores.

The lumber of the southern yellow pine brings \$15 to \$35 per thousand feet, its turpentine 56 cents per gallon, its rosin from \$4.35 to \$6.95 per 250 pounds, and its pitch \$3.25 per 250 pounds. All these prices are gradually becoming higher and higher on account of the increased demand and the scarcity of the products. Formerly, turpentine could be purchased for 30 cents a gallon. Now 56 cents must be paid at wholesale, and the consumer of gallon lots will pay at times as high as \$1.00.

In the face of these fast increasing prices, people are still found who say that there is yet an inexhaustible supply of yellow pine in the south, and that all talk about a famine is unwarranted. Such statements are not justified by conditions and the yellow pine lumbering industry will soon be in the face of a serious shortage unless decided changes are made in the present methods, and unless valuable products now going to waste are utilized. The longleaf pine is a slow-growing tree and does not make timber with anywhere near the rapidity that it is being cut. The situation calls for making the very best use of the present supply.

There are at present in the woods of the south vast quantities of pine logs and tall stumps left as a result of careless lumbering in the past. This material is rich in turpentine and could be made to yield from ten to fifteen gallons of refined spirits per cord. Besides this, there is a great waste in the sawmills in the form of slabs, edgings, and sawdust, all of which must have a value, but at present is, for the most part, simply burned to get it out of the way. In fact, not more than 50 per cent of the tree as it stands in the forest comes to the market in the form of valuable materials.

In the year 1906 the reported cut of southern yellow pine was some 12 billion board feet. A conservative estimate of the actual amount of turpentine alone, to say nothing of wood fiber and other materials, which could be produced from the wastewood of this one year, would place the amount at not less than 30 million gallons. This is a surprising figure, when it is remembered that it represents an amount almost equal to the present annual production of gum spirits in this country. If this product were extracted from the wood and sold at even the current price of good wood turpentine, the gross saving would be easily \$14,400,000.

Men have realized for some time that an enormous waste of valuable substances is going on, and a few have succeeded in extracting the turpentine and placing on the market a material of a fairly good quality. In the majority of cases, however, the article has been of an inferior grade, due generally to the fact that the technical methods used have been faulty. As a result of this, wood turpentine is at present often considered as an adulterated material, or at best as a poor substitute for gum spirits. It is true that in some cases these opinions are well founded, but inferior products have put an unnecessary damper on the whole industry.

The Section of Wood Chemistry of the Forest Service has lately been investigating this subject, and some valuable results have been obtained. It has been found that for the recovery of turpentine from wastewood, the steam distillation process is far superior to that of distilling the wood destructively. The crude turpentine is in all cases more uniform, and the final refined materials are as a rule of better grade and can command a higher price.

When properly made and refined, experiments have shown that the steam turpentines are in many cases even more uniform and the final refined materials are as a rule of better grade and can demand a higher price. When properly made and refined, experiments have shown that the steam turpentines are in many cases even more uniform in composition than the gum turpentines, and for all practical purposes contain the identical substances. The odor often can not be distinguished from that of the gum spirits, but even if it could, it is a small matter in many cases, as infinitesimal and undetectable amounts of certain impurities left in the refined product as the result of the methods of production can produce this slight difference in odor and the wood turpentine should not be condemned for practical purposes on this account. This becomes still more evident when it is known that the odor of the gum turpentine is not characteristic of itself, but is due to an impurity produced by the chemical action of air upon it.

These are important discoveries and are well worthy of consideration. If they are true, then refined steam turpentine, properly prepared, should bring at least an equal price in this country with gum turpentine. Indeed, abroad, this is often the case, and instances are on record where the refined steam turpentine has, by virtue of its more uniform composition, brought five cents a gallon more than the gum spirits, and is in much greater demand. Further investigations along these lines will be pushed vigorously by the Forest Service.

Clocks are very convenient things not to have in the house if you come home at 4 in the morning.

NEW DEPARTMENT FOR THE STUDY OF HARMFUL INSECTS

Raleigh, Oct. 12.—Farmers, fruit-growers, truck gardeners, and, in fact, all who are interested in agriculture in North Carolina should be interested to learn that the A. & M. College and Experiment Station has established a new "Department for the Teaching and Study of Insects." This is not a new line of work for the state, as the state entomologist of the department of agriculture at Raleigh, has for a number of years, conducted the work of the inspection of orchards and nurseries, and undertaken investigation and control of certain injurious insect pests. There must be, however, many problems that the state entomologist has not, and may not, be able to undertake.

The new entomologist, R. I. Smith, at the A. & M. College and Experiment Station at West Raleigh, comes from Georgia where he held the position of state entomologist for a number of years. In that position he was enabled to gain a wide experience in the control of injurious insects of the Southern states.

In taking up the work in North Carolina the entomologist desires to obtain the cooperation of the farmers and fruit-growers of the state. Letters and correspondence are the best means to this important end, and it is his earnest desire that everyone will feel free to write for information. Specimens of insects, their eggs or cocoons, together with samples of the work of injurious forms should be sent with the letters. Insects should always be sent separately in a tight wooden or tin box plainly labelled with the name and address of the sender.

Experimental work looking toward the control of some important insect pests will be taken up by the entomologist, and letters from farmers and others over the state about the principal insects will greatly aid him in selecting lines of work that will be of greatest benefit.

The state experiment station work in all its branches, is for the benefit of the citizens of North Carolina. This is perhaps particularly true with investigations of injurious insects. Statistics show that insects destroy about 10 per cent of all agricultural products each year. Hence very little thought is needed to make one realize the importance of insect control.

Insects injuring household goods, stored products such as corn and small grains, garden, field crop, and fruit tree pests, all help to cause the annual loss.

Most crops for this year are practically beyond damage from insects for this year, except perhaps cotton and some late garden crops. During the past summer, however, much injury has no doubt been caused by various insects of the farm and orchard. Letters concerning such damage will be welcomed by the entomologist. Furthermore in many cases he may be able to suggest methods for preventing the re-appearance and damage from such insects next year.

All citizens of North Carolina should grasp this opportunity of getting information and assistance entirely free of cost.

All packages should be addressed to: R. I. SMITH, Entomologist, Agricultural Station, West Raleigh, N. C.

SENTIMENT MUST BE ELEVATED

Marriage Will Never be a Complete Success Until Men Learn Loyalty to the Home.

It is clear that the only hope of reforming the marriage laws is in re-organizing public sentiment, says the Rev. Dr. Patton in The Delineator for October. I do not believe that in the long run practical legislation will rise much above the level of average theoretical belief. All departures, therefore, from the view that marriage is a divine institution are a menace to society, and the institution merely a phase of biological evolution are in principle destructive of the home. But there is sentiment of loyalty to family ties which men have in spite of their theories and there is a chance, therefore, of appealing to the sympathies of those who cherish sweet memories of the little kingdom of the home over which their mothers ruled. By all means let that appeal be made. The Christian church in both Catholic and Protestant forms can do much to prevent society from lowering its own ethical estimates to the level of statutory regulations. It is very easy for men to feel that what the law allows cannot be wrong; and very difficult to enforce the requirements of a transcendental standard against that which is set by the law of the land.

Prepares for Crown.
Berlin, Oct. 14.—Crown Prince Frederick William today began a year's work in the Prussian ministry of the interior in preparation for assuming the crown.

THE PRICE OF HEALTH
"The price of health in a malarious district is just 25 cents; the cost of a box of Dr. King's New Life Pills," writes Ella Clayton, of Noland, Ark. New Life Pills cleanse gently and impart new life and vigor to the system. 25c. Satisfaction guaranteed at C. M. Shuford and W. S. Martin & Co., druggists.

Death of Gen. Von Buelow.
Potsdam, Germany, Oct. 12.—Gen. Adolf Von Buelow, imperial adjutant, died of heart failure today.

DeWitt's Carbolyzed Witch Hazel Salve is good for little burns and big burns, small scratches and bruises and big ones. It is healing and soothing. Good for piles. Sold by C. M. Shuford and W. S. Martin.

When people reform, either they've been found out or are afraid they are going to be.

Valuable Furniture Left to Decay.

New York American.
A Black Hand letter, threatening the life of Jeremiah Casey, prominent inventor and former Mayor of Edgewater, N. J., brought to general notice yesterday the astonishing fact that since May 13, \$10,000 worth of the Casey family possessions have been standing unguarded and uncovered by the side of a public road in Edgewater.

On that date Mr. Casey, his wife and their beautiful daughter, Helen, standing on their principles in some litigation, allowed themselves to be evicted from their home. Their daughter, known on the stage as Justine Cutting, is a talented member of the Grace George Company.

Ever since then, neither the Caseys nor the borough authorities would touch the household goods. A grand piano, worth more than \$1,000 has been exposed to wind and storm, until now it is a sad ruin. A billiard table that cost \$700 is likewise a wreck. Costly furniture, paintings, and tapestries have lain in a pile until they are sodden and mildewed.

So determined were the Caseys to stand by their rights and refuse to rescue their property, that they even allowed their gold watches and the actress' diamond rings to stay in the bureau drawers.

"I do not know whether or not the watches and jewelry are still there," Mr. Casey said yesterday. "But I have a list of the articles taken away, and within a short time I am going to bring suit against certain borough officials for their full value."

STANDARD OIL CO. HEARING.

Comptroller Bainard and Others on Witness Stand in Big Case.

New York, Oct. 14.—Comptroller Bainard of the Standard Oil Company of New Jersey, in the government suit against the oil combine, testified that large loans were made to James McDonald by the Anglo-American Oil Company were ordered from London. The witness was the American Secretary of the Anglo Company and McDonald was managing director in London. Concerning the Southern Pipe Line company's loans of over \$20,000,000 to E. S. Trainor, the witness thought Trainor reported his losses to the Standard Oil Company of New York, the Southern Pipe Line company reimbursing the Standard for losses and charging the amounts to Trainor's account. He thought these losses were incurred in the purchase and sale of oil. He said he knew nothing about the loans by the Standard Oil company of New York aggregating \$2,000,000 last year to "interests other than Standard Oil Co." First Vice President Wescott, of the Standard Oil company of Kentucky, also testified.

Women Who Smoke.

New York Press.
A tobaccoist says: "We have special orders from some of the swiftest women in New York and other cities for cigarettes. Mrs. S. has her monogram on each wrapper, the latter being made of the finest macerated and laid corn shuck. This wrapper—the most exquisite gotten up—is positively without odor in burning. The cigarettes, containing the best tobacco we can find in the world, are worth \$2 a packet. Our best customers are women. They never come to the store to bother us with sampling, but order by messenger or letter, and usually take what we send them. Every cigarette is made by hand. The monograms are made from dies and stamped in gold."

Loss of Dog Made Man Insane.

Pathologic (L. I.) Dispatch to the New York Herald.
Frank Albin, of this place, has been sent to the asylum at Yonkers, L. I., in a demented condition, his mind, it is believed, having been affected by the loss of a dog which the poundmaster took away from him.

Albin was very much attached to the dog and acted queerly a few days after the poundmaster took the animal away. When Father James J. Cronin, of St. Francis de Sales Church, went to visit Albin on Sunday, the latter mistook him for the poundmaster and tried to strike him.

No home is so pleasant, regardless of the comforts that money will buy, as when the entire family is in perfect health. A bottle of Orin Laxative Fruit costs 50 cents. It will cure every member of the family of constipation, sick headache or stomach trouble. W. S. Martin & Co.

Over-Work Weakens Your Kidneys.

Unhealthy Kidneys Make Impure Blood.

All the blood in your body passes through your kidneys once every three minutes. The kidneys are your blood purifiers. They filter out the waste or impurities in the blood. If they are sick or out of order, they fail to do their work. Pains, aches and rheumatism come from excess of uric acid in the blood, due to neglected kidney trouble.

Kidney trouble causes quick or steady heart beats, and makes one feel as though they had heart trouble, because the heart is over-working in pumping thick, kidney-poisoned blood through veins and arteries. It used to be considered that only urinary troubles were to be traced to the kidneys, but now modern science proves that nearly all constitutional diseases have their beginning in kidney trouble.

If you are sick you can make no mistake by first doctoring your kidneys. The mild and extraordinary effect of Dr. Kilmor's Swamp-Root, the great kidney remedy is soon realized. It stands the highest test of its wonderful cures of the most distressing cases and is sold on its merits by all druggists in fifty-cent and one-dollar sizes. You may have a sample bottle by mail. Home of Swamp-Root, free, also pamphlet telling you how to find out if you have kidney or bladder trouble. Mention this paper when writing Dr. Kilmor & Co., Binghamton, N. Y.

Corner-Stone Laying Of Y. M. C. A. Building

Winston-Salem, Oct. 14.—The exercises in connection with the laying of the corner stone of the new \$50,000 Y. M. C. A. building here, were held yesterday afternoon at 3:30 o'clock and a large crowd of people were present to witness the exercises. The principal address of the occasion was delivered by Hon. G. W. Atkinson, Judge of the Court of Claims of the District of Columbia, and former Governor of West Virginia. In addition to this address several other speakers made short addresses. A letter was also read from Governor Glenn congratulating the local association upon the splendid work it had accomplished in the past and bidding it God-speed.

The new building is now well under construction and it is hoped to have it completed by February at the latest.

Is Not the Dispenser of Rockefeller's Millions

New York, Oct. 14.—Dr. C. F. Aked, pastor of the Fifth Avenue Baptist Church, wants it known that he is not the almoner of John D. Rockefeller. Some one here recently cabled to London papers the erroneous statement that Dr. Aked has been retained to disperse the fortune of John D. Rockefeller. Then Dr. Aked's troubles began.

"From all over the world and especially England," said the minister, "I have received no fewer than 3,000 begging letters since that ridiculous article was printed in London.

"I did nothing for a time but open the mail. Then I appealed to the postal authorities as I simply had to do something to stop the stream of letters."

Dr. Aked wishes it understood that he came here from London to preach the gospel and not to disperse anyone's millions.

Fire At Philadelphia Did \$300,000 Damage

Philadelphia, Pa., Oct. 14.—Fire this morning at the Pencoyd Iron Works, of the American Bridge Company, of this city, caused damage to the extent of about \$300,000.

The carpenter shop, lumber storehouse, erecting shop and two dwellings were destroyed, including some important plans and models.

Twelve freight cars of the Philadelphia and Reading Railway were also consumed.

The fire is believed to have been started by tramps who were spending the night in a freight car.

May throw Girls Out Of Work

New York, Oct. 14.—Typewriter girls may find their occupation gone, if what is said of a new invention, turns out to be true.

It is exhibited at the business show in Madison Square Garden, and is an automatic typewriter, run by compressed air and capable, it is said, of writing from 5,000 to 10,000 words an hour for 24 hours at a stretch.

The inventor is A. McCall, of Columbus, O.

DOING BUSINESS AGAIN.

"When my friends thought I was about to take leave of this world, on account of indigestion, nervousness and general debility," writes A. A. Chisholm, Treadwell, N. Y., "and when it looked as if there was no hope left, I was persuaded to try Electric Bitters, and I rejoice to say that they are curing me. I am now doing business again as of old, and am still gaining daily." Best tonic medicine on earth. Guaranteed by C. M. Shuford and W. S. Martin.

A brilliant Naval Pageant

London, Oct. 14.—There is now assembling in the North Sea and English Channel for maneuvers, under command of Admiral Lord Charles Beresford, the fleet of British warships representing an aggregation of naval power surpassing all immediately available resources of any other two other countries of Europe.

The home fleet, now assembling, consists merely of those ships maintained in the vicinity of the British Isles and which throughout the year has been engaged in training.

It numbers 110 pennants and is composed of 26 battleships, 15 armored cruisers, several protected cruisers, various auxiliary vessels and 43 torpedo vessels.

The first section of the coming naval maneuvers, covering four days will be of a tactical character and the final days will be devoted to studying the problem of detecting the ships against torpedo attacks.

Fearful Devastation By Floods in Spain

Barcelona, Spain, Oct. 14.—Losses due to the late floods in the valley of Llobregat will amount to several million pesetas.

The crops still standing are regarded as lost.

Many factories have been ruined, railroad tracks in many places have been washed away and water in the streets of some of the villages was 12 to 15 feet deep, but is not falling.

The governor of Barcelona is sending assistance to the sufferers.

The blooming rose is beautiful,
But the blushing bride more dutiful,
All the crimson tints you like to see
Are her's
By taking Rocky Mountain Tea.
E. B. Menzies.

NOTICE!

We want every man and woman in the United States interested in the cure of Opium, Whiskey or other drug habits either for themselves or friends, to have one of Dr. Woolley's books on these diseases. Write Dr. B. M. Woolley, Atlantic Sea, Box 287, and one will be sent you free.
