Put This Stove In Your Kitchen

NEW PERFECTION Wick Blue Flame Oil Cook-Stove

It is wonderfully convenient to do kitchen work on a stove that's ready at the instant wanted, and out of the way the moment you're done. Such a stove is the New Perfection Wick Blue Flame Oil Cook-Stove. By using it you avoid the continuous overpowering heat of a coal fire and cook with comfort, even in dog-days. The

is so constructed that it cannot add perceptibly to the heat of a room; the flame being directed up a retaining chimney to the stove top where it is needed for cooking. You can see that a stove sending out heat in but one direction would be preferable on a hot day to a stove radiating heat in all directions. The "New Perfection" keeps a kitchen uniformly comfortable. Three sizes, fully warranted. If not with your dealer, write our nearest agency.

Bigger Cotton Yields Per Acre

The value of commercial fertilizers has been demonstrated over and over again by both government and private comparative tests. We stand ready to demonstrate to you at any time that the surest way to "increase your yields per acre" is to use

Virginia-Carolina Fertilizers

Hon. R. J. Redding, former Director of the Georgia Exp. Station, is authority for the statement that "experiments made at this station show that well balanced commercial fertilizer applied to one acre of land, and well cultivated, may be reasonably expected to produce an increase of yield of seed cotton. At the present price of cotton this would mean a large extra profit (for both lint and seed), after deducting the price for fertilizer."
You'll find reports of many other comparative tests, together with much valuable information concerning land culture in the new Virginia-Carolina Year Book or Almanac. Ask your local fertilizer dealer for a copy—or we'll send you one free, if you write our nearest sales office.
