

## A Welcome Change

Smoke curling up from the farmhouse chimney as the men are coming in from the fields, gives a pretty suggestion of a good supper and a comfortable home. But it also means a hot, tired woman, working hard over a blazing fire.

Your wife can escape this with a New Perfection Oil Cook-stove.

A New Perfection keeps a kitchen many degrees cooler than any other range, yet it does all a coal or wood range can do. It saves time, labor and fuel. No wood to cut; no coal to carry; no ashes; no soot. With the New Perfection oven it is the best cooking device you can find anywhere.

WICK-BURNER RANGE  
**Oil Cook-stove**

Made with 1, 2 and 3 burners, with long, turquois blue enameled chimneys. Hand-burner stoves can be had with or without a cabinet top, which is fitted with drop shelves, towel racks, etc.

Dealers everywhere; or write for descriptive circular to the nearest agency of the Standard Oil Company (Incorporated)

### Sympathy for Deacon Rockefeller.

The deacon has plenty and is in condition to tell the Supreme Court to go hang with its decision for all he cares, but he has collected the tribute for so long and it was under the master management he inaugurated—so easy, "like getting money from home," that he will probably be so much perturbed—not on his own account, oh, dear no! but on account of the dear people to whom he has been a benefactor—that it will doubtless take all the religion Dr. Archibald Johnson thinks he has, to sustain him in this hour of trial.

## ANNOUNCEMENT To the Ladies of Hickory.

We have been told there are many families in Hickory and its suburbs who desire to be relieved of the drudgery of washday at a small expense. We have started a Family Laundry at Kenwood Falls where we have plenty power and spring water. Our driver will get the laundry Monday and Tuesday, and return it in a neat bundle as soon as possible. We propose to wash your goods as clean as machinery can make them, at the very moderate rate of two cents per pound. This is cheaper and with less worry and trouble than you can have it done in your home. Why should you work, work, work, till your head begins to swim. Work, work, work, till your eyes grow weary and dim. When we can relieve you all washday drudgery at such a trifling expense? As soon as we are prepared to iron by electricity, we shall perform that work for those who desire it. The day is fast approaching when all laundry work will be done by machinery instead of by hand labor. The average family wash will run from 35 to 45 cents; no bundle accepted for less than 25 cents. Give us a trial. PHONE 508-1, or write a postal to:—

### Are You Insured?

If your buildings burned to-night would they be a total loss to you? Are you insured, or are you just "Taking Chances?" Isn't this a very important matter to you? Can you afford to lose your house or store or barn by fire? An INSURANCE POLICY won't prevent fire, but it WILL give you something to repair the damage after it, and will only cost you a few cents a day. Call us up—our Phone is No. 292 and tell us you want to talk about insurance. We will call and see you immediately.

## Acid Phosphate For Our Red Soil

The State Chemist Talks About the Test Farms.

The Democrat had a talk with State Chemist Kilgore while he was in this city last week in company with the test farm committee of the State Board of Agriculture, and learned from him that this work is more and more interesting and proving of great value to the farmers of the State.

In the Iredell test farm, two miles from Statesville, there are 200 acres, and it is used largely for experiments with cotton, corn, wheat, oats and clover. The experiments here have shown that the red clay soil of this section is very deficient in phosphates and that potash is not beneficial to the soil. The value of the phosphates is to make the crop early and large.

The department has been able to produce on this farm a bale of cotton to the acre although when it first took hold of the farm it was producing only from a fourth to a half a bale an acre.

One thing that the department aims to bring up the breed of stock and a full-blood Percheron horse has been purchased and is being bred to the mares of the section. The effect is to put a larger and sturdier class of farm work stock on the farms. The first pair of horses bred on this farm from this Percheron are now three years old, weigh 1800 pounds, are gentle and easily handled. They are proving splendid stock for the heavy clay lands.

Many farmers come from far and near to see the experiments in progress here, and to note the methods employed for building up the soils. At the institute held there last year there were present 1800 people.

The Buncombe farm consists of 300 acres and is located at Swanano. The same fertilizer experiments as used at the Iredell farm are being tried there, to see what can be done to improve the crops of corn, grains, grasses, etc.

The rotation experiments are carried on to show what it is the best rotation for the mountain section.

Special attention is being paid now to Irish potatoes and apples. There is a Percheron horse at the Buncombe farm, too, and sheep and hogs are being raised. This farm is only three years old but already excellent work has been done.

There are two test farms in the east—the Edgecombe and Pender farms. At the latter the tests are largely in trucking, which is proving so profitable in Eastern North Carolina, and Catawba farmers will be interested to hear that on it there is a model building for a Jersey dairy farm.

On the Edgecombe farm cotton, corn, peanuts and the soil improving crops, such as crimson clover, burr clover and vetch, are tested out.

"What is the best way to treat the red soil of our own and adjoining counties," the Democrat man asked Prof. Kilgore.

"Acid phosphate with peas for a soil improver crop," replied the State chemist. "On the Iredell farm we used from 400 to 600 pounds to the acre, which brought the cotton production up from one-fourth of a bale to one bale to the acre."

### Thousands Have Kidney Trouble and Never Suspect it.

Fill a bottle or common glass with your water and let it stand twenty-four hours; a brick dust sediment, or settling, stringy or milky appearance often indicates an unhealthy condition of the kidneys; too frequent desire to pass it, or pain in the back are also symptoms that tell you the kidneys and bladder are out of order and need attention.

What To Do. There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great Kidney remedy, fulfills almost every wish in correcting rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. Corrects inability to hold water, and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often through the day, and to get up many times during the night. The mild and immediate effect of Swamp-Root is soon realized. It stands the highest because of its remarkable health restoring properties. If you need a medicine you should have the best. Sold by druggists in fifty-cent and one-dollar sizes.

You may have a sample bottle sent free by mail. Address Dr. Kilmer & Co., Binghamton, N. Y. Mention this paper and remember the name, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

## Did W. J. McDonnal Live Near Here?

The First National Bank of this city has received a letter from Sheriff R. J. Roane, of Swain county, relative to the death of one W. D. McDonnal, who leaves some property and is supposed to have come from this section. The Democrat will be pleased to get any information regarding his people. The following is the letter of Sheriff Roane, dated at Bryson city:

Do you know of a man by the name of W. D. McDonnal? there was a man by that name found dead in the woods in this county, on the 5th; he was getting out acid wood. He was working by himself, with one ox and it seems that he hitched the steer to a log, his grabs pulled out and the log rolled over him and killed him. I had an inquest held over him today and the jury's report states that he came to his death by accident. I had him put away in good shape. He had some eleven or twelve dollars on his person; one old ox some tools and a lot of wood on hands and some two or three cars shipped.

It is reported that he came from your town, or near there and has some money in your bank, and a farm near Hickory. If so please notify his people, if he has any. Please let me know at once if he has any connections in or near your place, and oblige. Yours Truly, R. J. Roane Sheriff.

(The man had no money in the bank.)

**We Raise Most Cotton to the Acre.**

Raleigh Correspondence Observer. There is much gratification expressed by the Commissioner of Agriculture W. A. Graham at the showing that North Carolina has in the official report of the production of cotton in the Southern States, the report just out showing that North Carolina produced last year more cotton to the acre cultivated than any other Southern State. The yield in this State, according to the government report, was 227 pounds to the acre, 80 pounds to the acre more than the Texas yield. Of all the cotton-growing States, only California and Missouri excelled the yield of the former being 335 pounds to the acre and the latter 285 an acre.

**Children Cry FOR FLETCHER'S CASTORIA**

Mr. Gordon H. Cilley, of Philadelphia, is visiting his relatives in this section. Mr. Cilley is now at the head of Wanamaker's advertising department in Philadelphia, a position of great responsibility and in which he has had more than made good although he has been with the house for little more than a year. Mr. Cilley learned the printer's trade in the old Hickory Press office, the predecessor of the Democrat. He worked for Mr. Click on the Mercury, went to the Charlotte Observer and from there to the Philadelphia Record. On the two latter papers the editor of the Democrat worked with him. He has been working hard of late and has come home for a two weeks rest. He spent part of this week fishing at Linville and Linville Falls.
