IOIN PRODUCERS AND CONSUMERS

System Through Which Retailers Buy From Farmers.

ELIMINATES THE MIDDLEMAN.

Secretary Wilson Has Advocated Some Such Plan-Recent Report Shows How Prices Are Doubled-What Des Moines Has Done.

By JAMES A. EDGERTON. HAT the consumers of the cities

have been compelled to pay from two to five times as much for food products as those products cost on the farms is a fact that has slowly been sinking home in the American mind. That this is the great cause of high prices has also become a general conviction. How to meet the situation has been the question. The common sense answer is that the farmer and consumer must get together. This cannot be done individually, or at least it is not done. Therefore the only way is for it to be done collectively. Luckily the cooperative movement in other parts of the world furnishes an object lesson as to the way it may be accomplished.

A co-operative movement that would bring about direct contact between the producer and the consumer or between the producer and the retailer would eliminate most of the profits that have been going to a number of middlemen. This is the high prices. question in a nutshell. Until the American people are ready to protect themselves by following common sense and buying their produce direct from. the farms, or as nearly so as can be contrived, they will continue to be imposed upon. The present system. gouges in two directions, forcing down the prices the farmer receives and forcing up the prices the consumer pays. Yet the producers and consumers constitute the vast bulk of the population. Their salvation is in their own hands. All they need is to come together for their mutual benefit and provide machinery for direct commerce

This machinery is already, being fashioned by the grange that has had a long term of preliminary training in the grange stores. In the city of New York the grangers and busin working with them have formed the United Stores association for the express purpose of bringing together producer and retailer. The plan has been set forth in the prospectus of the company, from which liberal extracts are made. This prospectus was written by Roland Onnfroy, founder and executive chairman of the United Stores

between them.

Co-operation the Only Way.

The continuous rise in the prices of the necessaries of life, with the consequent pressure upon the consumers, due largely to unnecessary intermediums and costly methods of distribution, suggests that the time is opportune for the introduction in the United States of an improved system for the sale and distribution of all commodities to the consumers.

Distributive co-operation is now the manent basis. only possible and efficiently tested remedy against the evils of the high cost

To Great Britain belongs the honor in the organization of "societies" (cor- land's stupendous figures. porations) whose primary and generally sole object is the purchase and distribution of all necessaries and commodities of life-equality and full measure being essential-for the exclusive benefit of their members, who are at the same time the stockholders. returning to them "the largest portion | of the profit upon cost" included in the retail selling price.

This "profit upon cost," known as the "dividend," is paid in cash to each member of the co-operative society pro rata to the amount of his purchases in the store of his society.

Settlements are made quarterly. Besides his "dividend." the member receives interest on his stock at a rate varying from 5 to 8 per cent per an-

In the payment of this cash dividend quarterly to the member, an idea which must be credited to Robert Owen, lie probably the strength and the greatest cause of the popularity and stupendous growth of the co-operative movement in the British Isles.

The gigantic movement, started in 1844 with the humblest beginning, was of very slow growth, having had to carry on for over forty years the hardest conceivable fight against the combined forces of the manufacturing. wholesale and retail selling, banking and legislative representatives of the

But it was a fight of the wage earners, the people against abuses and extortion on the part of the distributers and retailers of the necessaries of life. Their cause was just. They were entitled in exchange for their hard earned money to receive full value for their purchases of all necessaries of life. They won because their cause was

In the last twenty years the might of right has become the might of number and has placed co-operation in

where the farmers and hucksters, tion to the amount of his and his fammight sell directly to consumers. So fly's trade with the stores or firms successful has been the plan that a duly licensed by the association.

second market was recently opened. fort to reduce prices may prove of cash purchases made by the member benefit to other communities. The cost at current retail prices. of living became so high in the Iowa city that a commission was appointed table retailer now in business is eligi to investigate. This commission found ble to membership. He gets his prod that prices were higher in Des Moines than in Chicago and considerably high-a central distributing agency. er than in smaller cities of the middle west. For example, prices in Dubuque were 25 to 35 per cent less. Now, Dubuque is only about 200 miles is only given as a sample of what may from Des Moines, and natural condi- be done. operation in this country. But there exists an American plan, now ready to be put in operation. It For the seventy-eight cities the farmer is the result of twenty years of close study of the conditions required to meet the instant favor of all without attacking or interfering with any of 69 per cent in the case of eggs. 75 per the industrial, commercial, producing cent in the case of dried beans when and financial interests at present ex-

isting in this country. The aims of the United Stores association through the permanent organ-"distributive co-operation" are:

To bring close together the three so cial but divided elements-consumer. distributer and producer - causing them to reciprocate in a mutual and constant effort to help each other.

There are two classes of membersthe associate purchasers and the associate dealers.

The main objects of the association says, that the farmer is not getting

purchaser, are: First.-To enable him to procure all time of delivery at destination by the necessaries of good quality, of just railroad to delivery to the consumer measure and weight and at fair prices. is the feature of the problem of high Second .- To pay over to him from prices which presents itself to the con-

100.8 per cent above the price received The example set by England is being by dairymen. In other words, the eagerly followed among all civilized farmer's price was fully doubled. The lowest increase among the geographic divisions was 75.5 per cent in the south 111.9 per cent in the western states. Officials in the department of agriculture point out that this wide discrepancy between the prices received

by farmers and the prices paid by consumers is not of recent origin. Twelve years ago the industrial commission went into this subject somewhat extensively. It developed some large percentages of increase of prices to consumers-135.3 per cent for cabbage bought by the head, 100 per cent for melons bought by the pound, for buttermilk sold by the quart and for oranges sold by the crate; 260 per cent for onions bought by the peck, 400.4 per cent for oranges bought by the dozen, 111.1 per cent for strawberries bought by the quart and 200 per cent

The investigation of a year ago by the previous attempts to establish co- | the department of agriculture showed that poultry almost doubles in price between the farmer and the consumer. received 55.1 per cent of the consumer's price. Of the price per dozen paid by the consumer the producer received bought by the bushel, 48.1 per cent in the case of cabbage when bought by the head, 75 per cent in the case of

when bought by the bunch. Farmers Not to Blame. Secretary Wilson declares that the has no well grounded complaint against the farmer for the prices that he pays. It is plain, the secretary regarding the consumer, its associate exorbitant prices for his products and that the cost of distribution from the

Halloween at Claremont.

A select crowd of boys from Lenoir College and the city Monday night at a Hallowe'en pary given by the Claremont Mr. Robinson Will Build Hick-College girls.

The program for the evening was unique in every respect.

The guests were received at the door by a ghostlike figure holding a basket of peanuts on one arm and very cordially extending a gloved hand to welcome the boys as they approached tremblingly. A mere touch of that hand was enough; for it was incased in a rubber glove which, when touched, imparted a sensation which would cause the most courageous to shiver. After having recovered from the shock given by shaking hand of about 40 men, builds his roads Death, the boys were present- this way.
