furnish better preparation for more profitable farming and more comfortable living in the country.

The supervision and control of public service corporations is a well recognized right of the State and national governments, and we pledge ourselves to the enforcement of this right in the interest of the people of the State, consistent with fair and just treatment to the public service corporations and no public service corporations shall grant any special privileges, or other favor, to any person or corporation.

We are opposed to, and demand the suppression of trusts and monopolies, and favor the enactment of such laws in both State and nation, with such necessary machinery and powers as will make their existence impossible. We believe that guilt is personal, as well as corporate, and we demand that all anti-trust laws be enforced both by the civil and criminal processes of our courts.

We denounce protection as a robbery of the many to enrich the few, and we favor a tariff limited to the needs of the government, economically administered, and so levied as not to discriminate against any industry, class or section, to the end that the burdens of taxation shall be distributed as equally as possible.

We favor a revision and reduction of the tariff to a revenue basis by the friends of the masses and for the common weal, and not by the friends of its abuses, its extortions and its discriminations, keeping in view the ultimate "equality of burdens and equality of opportunities" and the constitutional purpose of raising a revenue by taxation, to-wit: the support of the Federal government in all of its integrity and virility but in simplicity.

We heartily endorse the record of our Senators and Representatives in the Congress of the United States, and the administration of our State's affairs by our Governor and other State officers.

We have faith and confidence in the intelligence and patriotism of the people of the State, and in the ultimate development of our unrivaled natural resources, and we call upon all North Carolinians to unite in one common effort to continue in power the administration of the party under whose government the State has made such rapid strides and developments since its advent to power.

John R. Gibbs, a white man living near Bath, N. C., called his little two year old son to his work late and entered his room, saying to the child: "Come here, honey; daddy wants you." The child went to him and his mother a few minutes later found him gasping his life out. The father calmly walked out on the porch and sat down. He said that he had a reason for killing the child, but would not give it. He was taken to Washington, in Beaufort county, for safe-keeping, as the people of Bath were very much stirred up over the crime.
