Bad Spells

"I suffered, during girlhood, from womanly weakness," writes Mrs. Mollie Navy, of Walnut, N. C. "At last, I was almost bed-ridden, and had to give up. We had three doctors. All the time, I was getting worse. I had bad spells, that lasted from 7 to 28 days. In one week, after I gave Cardui a trial, I could eat, sleep, and joke, as well as anybody. In 8 weeks, I was well. I had been an invalid for 5 weary years! Cardui relieved me, when everything

that the only power given county boards by the amendment is affairs. that of providing the machinery whereby compulsory attendance of Daniel C, Roper, Joseph Stewties, and he doubts the legal it would be held that the effort has here been made to confer legislative power on the county

The opinion of the Attorney General derives an added significance from the position which he is, by statute, just about equivalent to a court of last resort in matters pertaining to the

school laws. There is perhaps not a general understanding of the educational legislation enacted. The so-callall funds coming into the State treasury, to be disbursed for a total to the school term. This sum is estimated to be \$400,000, or enough not to provide a six months term, but a term of a little short of six months, in all the public schools. A county, it seems, must levy a pecial tax if necessary to bring the school term up to four months. Heretofore there has terms to about six months.

months. Heretofore there has inaugurated. It covers that secbeen a fund of \$225,000 for this tion of the United States lying BEGINNING at a stake on the purpose. But this \$225,000 will now be used otherwise; that is, if a special county tax of not more than 15 cents on the \$100 is insufficient, then the necessary funds additional come out of the \$225,000. This fund in a word, is used to equalize school terms up to four months after terms up to four months, after system has been a great success the provisions of local taxation have been exausted; then the fund estimated to be \$400,000 on the small next the saving will be applied to extension of on the small part of the whole mail that this portion covered for a term of seventeen months was \$364,995.50.

> from office, was firm in the belief that an immense saving could be effected throughout the country if this plan were followed. and all large eastern magazine publishers required to distribute

> their product in this manner. The Curtis Publishing Co., of Philadelphia, probably the largest periodical publishers in the world, ship out of Philadephia by regular mail service every day, from 5 to 10 fully loaded cars stacked to the roof with magazines. These are carried at the rate of one cent per pound or \$20 per ton, When shipped in this way they may be carried for that rediculous sum, all the way from Philadelphia to California.

Letter mail, on the other hand. costs its originators an average rate of over 84c per pound, because there are in the neighborhood of 45 pieces, including some p stal card, to the pound. This means a cost of \$1680 per ten to the originator of letter mail, as against \$20 per ton for the big magazines published in the East. some of which charge as high as \$5,000 a page for advertisements.

It is claimed that the loss to the government through this lack of business method is over \$60,000,000 per year, sufficient to entirely eat up the surplus furnished by first class mail.

It is to investigate this entire problem with a view to making recommendations for a suitable readjustmentthat the commission will deal. Sentiment in favor of a one cent letter rate is now strong throughout the country, according to officers of the National One Cent letter Postage Association, which has its headquarters in Cleveland, and which is conducting a vigorous campaign for the lower rate.
