PUT IRON IN THE WATER YOU DRINK

Fifty Cents Worth in Four or Five Gallons of Water Makes Tonic For Whole Family

FINE FOR WARM WEATHER
 Non-alcoholic Natural Iron, known as Acid Iron Mineral, and obtainable now at most drug stores is bottled by the Ferrudine Chemical Corp. in a highly concentrated form suitable for home use, is not so much a medicine as it is a delightful, refreshing, appetizer, blood purifier, tonic and system building mineral water and for thirty years families in many parts of the country have diluted a fifty cent bottle in four or five gallons of water and used it on the table for the whole family to drink, and a wonderfully healthy idea it is too.

Iron is good for one and the foods we eat these days have less and less of this important element. Anaemic, weary, wornout folks young and old in need of a better appetite, steadier nerves, sounder sleep, and strength should get a bottle. It goes from two to ten times as far as other and very much cheaper iron preparations, is economical, powerful and quickly brings one back to their feet again. A half teaspoonful in a tumbler of water is the prescription for those in need of a bracing tonic and blood purifier. Being non-alcoholic and not a patent medicine there is no danger of kidneys, bladder, stomach or nerves and it does not injure teeth or cause constipation as many iron preparations are apt to do.

Get it at the nearest drug store or if they are out a large size bottle will be sent prepaid \$1. by the Ferrudine Chemical Corp., Roanoke, Va. Take it after meals as directed. You'll be amazed before the bottle is half gone.

WEIRD ANIMALS

Some of 'Em in This Collection Suggest an Attack of D T.

A collection of animals, including lions, tigers, snakes, chameleon, zebras, parrots, leopards and monkeys have arrived on a British freighter, consigned to Louis Ruhe, 248 Grand street, an animal dealer, for distribution among the zoological gardens in the western states.

According to the captain, the most remarkable animals on board were the four chameleon zebras, which had red, white and blue stripes and were first seen in Uganda by Col. Theodore Roosevelt on his African hunting trip. One of the zebras put its forehead on a hot brick and turned blue, the captain declared, and when the native attendant, Lambam, placed it in cold salt water the animal turned white. One and Joop, the two trained chimpanzees, were said to be remarkably intelligent and could hardly be distinguished from some kinds of human beings when they were attired in dungaree overalls and flannel sweaters.

The only incident worth mentioning on the voyage across the Atlantic, the captain asserted, was the sighting of what appeared to be a huge sea serpent ten days ago off the Grand banks. After looking at the object through their glasses from the bridge the captain and his chief officer recognized the strange monster as Buffum, a boa constrictor, 50 feet long, which was believed to have died on the previous voyage and was paid out over the stern.

Evidently the cold sea water revived the reptile, for the captain said that "it seemed to recognize its old ship." And he avers that it came alongside and tried to grab the cook who was standing on deck outside the galley. After it had been fed, the captain, who resented the imputation that he was spinning a sea yarn, asserted that the boa constrictor went away full speed toward the eastward by way of Suez and Gibraltar.

TO INVESTIGATE PEAT POSSIBILITY IN SWEDEN

 Stockholm, June 19.—Professor G.
