

A Seasonable Suggestion

CHASE & SANBORN'S Canister Tea The Best TEA for ICE TEA

BREW in the same manner as though serving hot, only make a little stronger, as the addition of ice will reduce the strength. When cold, add a small quantity of lemon juice and allow a few thin slices of lemon to float on top. Add sugar to suit taste. Use cake of ice large enough to keep it thoroughly chilled.

FOR LARGE QUANTITIES

use three ounces of tea for each gallon of water

Better Farming in the South

ORDER FALL FERTILIZERS EARLY

Railroad Service is a Serious Problem—Fertilizer Dealers Will Be Required to Accumulate Orders So That Full Carloads Only Shall Be Shipped—Railway Authorities Say Fertilizers Can Be Handled in Half Number of Cars Ordinarily Used—A War Measure.

Farm Service Bureau, Atlanta, Ga. C. A. Whittle.

The world is hungry. To get more food is an alarming problem. How can the farms produce more food when labor is so scarce? How can more acres be planted to food crops or how can more work be given the acres usually planted without more labor? Increase of labor is hardly to be expected, but there is one important means of help which the Southern farmer has been utilizing in the past and that is fertilizer. But this too is beset with difficulties. Fertilizer can increase production without increasing labor except at harvest time. The warring nations appreciate this fact, and are giving all the encouragement they can to the use of fertilizers. The railroads can't do the business expected of them unless every freight car is loaded to full capacity. To load them to full capacity the fertilizer dealer must have enough orders in to make up a full car load before he can reasonably hope to get a shipment. The earlier the carload orders are placed the better chance, of course, of getting a shipment. Because of the shortage of equipment, the railroads should have as much

time as possible to plan for moving the fertilizer. Early orders will give them a knowledge of the number of cars that will be needed.

Government Authorities Backing It The National Council of Defense has sent out a bulletin on this very subject, urging farmers to order their fall fertilizers early so full carload shipments might be made and the largest amount of human food produced.

The United States Department of Agriculture through the States Relations Service and Bureau of Soils; and agricultural colleges and county agents, are advising the same.

The railroads are very urgent about the matter. The fertilizer manufacturers are offering to help the dealers and farmers as much as possible to overcome the transportation difficulties.

Half Cars Can Be Saved

Railway authorities have statistics to show that half of the cars ordinarily used for hauling fertilizers could do the business, if only they are loaded to their maximum capacity.

Where a full car load can not be made up for one destination, then it is to be filled with orders for neighboring stations along a railroad.

More Wheat and Oats from the South

Farm Service Bureau, Atlanta, Ga. The South will be expected to take care of its share of wheat and oat production. Discouragement from the winter kill of the last season and labor conditions make the task of keeping up production no small one, but the country needs more of these crops if it is to take care of its allies. The prices which they are bringing, of course, do not discourage production. Even if the acreage cannot be increased the prices which the small grains are bringing justify the very best seed bed preparation and the maximum use of fertilizer. Growing cereals, of course, do not require as much labor as growing corn and cotton, it is true, but corn and

cotton will take their turn in every well planned farm.

The scant oat crop should be husbanded for seed this year. No oats are as good for planting in the South as those grown in the South, especially if they are grown in the region where they are to be planted. The same is true of wheat unless in a given section the best variety for that section has not yet been used.

Good seed should be ordered early. Unless fertilizers are ordered early, so that dealers can ship only in full carload lots it is quite probable that farmers will be disappointed when seeding time comes. The railroads will probably have more than they can do even with full carload shipments. It is a national necessity to see that no freight car space is wasted.

RECORD WANTS

OLD FALSE TEETH WANTED—Don't matter if broken. I pay \$2 to \$15 per set. Send by registered mail. I. Mazer, 2007, S. 5th St. Philadelphia, Pa. 7 6 1f

YOUR LAME HORSE

A WELL SHOD HORSE RARELY GOES LAME

Do you ever think of how much depends upon the soundness of your horse's feet?

Did you ever try to work or drive a lame horse?

You felt about as bad as the horse, didn't you?

For years we have made a study of scientific horse shoeing. Our shoes feel comfortable on your horse's feet and he has the full and free use of his limbs.

Don't let your horse suffer from bad shoeing. Bring him to us and have him shod for

both service and comfort. We Guarantee Every Job. Give us a trial. We also do first class painting and rubber tire work.
