# Our Hudsons Are About All Gone

Number of Super-Sixes at prices limited. Practically all makers have already increased prices.

We now see the last of the Hudson Super-Six cars will be able to sell at present prices. The factory has given us definite allotments. On at least two models they have notified us that final shipments will be completed within two weeks.

When those cars are sold it means that the last Hudson Super-Six to be had at the present base price of \$1,659 for the seven-passenger phaeton has gone. Then a new price will become effective. That price will be based upon material costs that are much higher than were those of the present production.

As a single example of the greater cost of an automobile today as compared to the cost of a year ago consider the item of iron. Its low price for the years of 1915-1917 was \$12.27 a ton. Today it sells at \$52.90 a ton. Iron is used in making the finest steels, the frame, the motor, the body, etc. Its use in a fine automobile constitutes a large item. You can get from this some idea of the tremendous need for automobile price increases.

Then when you think of the number of cars that have gone up in price in the last few months you get a further understanding of the great opportunity you have in buying a Hudson Super-Six now. More than

fifty makers have advanced prices within the past two months. Cars which formerly sold at \$1,200 and \$1,300 now cost about as much as a Super-Six. There was no question as to which was the preferred car then, though because of the lower price many such cars were sold. Now that there is no price advantage, Hudson sales are at their highest. People realize more than ever before that a Hudson offers the greatest value on the market. They are taking advantage of the opportunity that the present market condition offers. You, too, can save as they are saving if you act promptly. We know how many cars we are to get, but we do not know how much longer we can accept orders at present prices.

Be guided by the experience of the past as it affects the Super-Six. Buy now. It is like buying any other staple on which you have positive knowledge that there is soon to be a price increase.

Surely there need be nothing said in this connection to persuade you to a Super-Six. It has already established its reputation on every speedway, in every endurance test, in the most difficult mountain climbs, in the most arduous road trips, and most of all in the minds of more than forty thousand users.

## SAW HICKORY BOYS IN NEW YORK CAMP

Mr. and Mrs. F. P. Abernethy returned this morning from New York, where they went to see

Sergeant O. M. Sigmon, brother of Mrs. Abernethy, and the other Hickory boys in the rainbow division of engineers which soon will sail for France. Mr. and Mrs. Abernethy Sunday witnessed a review of the troops at Mineola and 27,000 of them passed in a parade of five hours. Secretary Baker was present for the occasion, and the soldiers were well and happy and looked mighty good in their new uniforms. Mr. J. L. Murphy, Jr., who was temporarily rejected for foreign service on account of defective vision, was to be given another examination, and he thought he would be accepted. The other Hickory boys in the division are Messrs. Jimmie Smith and Chester Williams.
