Beautiful 1918 Maxwell Now On Exhibition

Without altering the world champion motor, the famous perfected clutch and transmission or the mighty axles, the Maxwell builders have produced a new wonder car, far superior in construction and in appearance to anything yet turned out by the Maxwell factories—we have this new and beautiful car—come and see it.

The car is larger and roomier, for one thing—the wheelbase has been increased six inches. It is also a stronger and more rigid machine for

the road. The frame is now six inches, instead of three inches deep.

And the body rests directly on this powerful frame, instead of on brackets extending from the sides, as in the past. Do you know what that means?

It means this: The firmness with which the wheels grip the road and the steadiness of the car at high speed give you a sense of security such as you have been able to enjoy before only in cars shackled with a battery of shock ab-

There's a marvel of engineering for you, friends! The car is made bigger and stronger—and yet actually lighter. This means greater ease and comfort on the road.

More than that—it means greater economy.
