

OUR FARMER FRIENDS

Take Notice

If there ever was a time when the farmers should co-operate it is now. As an organization they can put a more uniform product on the market, and can handle their business in a more economical way. We are here to serve the farmers. We have served them in the past, and will continue to serve them, we hope, better in the future.

Before the creamery started, eggs and butter were a drag on the market in this section, and the farmers were obliged to take trade for their produce and some of the old due bills are in this section yet, and were it not for the creamery or some similar organization, very much the same conditions would be in vogue at this time.

Let us all put our shoulder to the wheel and make this the banner year for our local creamery, the largest and best equipped in the South.

Yours to Serve,

Catawba Creamery Company

DOLLAR DAY

We will have on display in our windows and store
many great bargains in

Hardware
