## LONDON OBTAINS ON ITALIAN SCHEME

By the Associated Press. London, Nov. 21.—British architects and town-planning experts, who are making plans for a great remodeling of British cities after the war, declare that one of the most successful experiments in new types of industrial and urban housing is that which has been made by the Italian good dwellings society in Rome. The idea of adopting something similar in England has been proposed.

"The Italian society," says a report on the Rome experiment, "has erected a block of working-class flats containing 800 dwellings, designed for all types and sizes of families. The flats are built on four sides of a square, with a garden in the center, in which the 'Children's House' stands by itself.

"You enter the quadrangle by a great gateway. To the left is a room for storing baby-carriages and bicycles. To the right is the porter's office with telephone and telephones for general use. Inside, nearest the gate, are flower beds and an open space for the pleasure of everyone. Beyond are the children's gardens, then the little low building called the Children's Home, a charming place, white, with great windows, that stand open to the air, and covered with rambler roses. Here is the nursery school for children under seven. Another big room in the children's house is the 'After School' where the children over seven do their home lessons on returning from school, under supervision and in conditions that they could not possibly find in their own homes.

"The 'After School,' the nursery school, and the cloak-rooms occupy the whole of the front of the Children's home. On the other side there is a group of rooms whose use is common to the whole establishment. There is a large common room for the women, fitted with electric sewing machines and electric irons, which can be used on payment of a small sum. Here also are great cutting tables and sewing tables, such as women know to be invaluable in sewing work but which are impossible in small homes. A common wash house and laundry is in the basement of the building.

"This central building also contains a 'surgery,' where a doctor is in attendance at stated times and any tenant may have free advice. If tenants need attention in their own apartments, there is a fee of 2s. cents. Twice a week the doctor examines all the school children.

"The buildings are equipped with numerous bath-rooms, but hot water is obtainable only at stated times. The flats are of various sizes, overcrowding is forbidden, and families must move into larger flats as numbers increase. The largest flats are designed to accommodate the parents and five children. Tenants who rise above a certain standard in the care of their dwellings receive a percentage of their rent back in an annual bonus."

### SPECIAL AT PASTIME TODAY

The special attraction at the Pastime this afternoon and tonight will be the "Lifted Veil" a five act Metro Wonderplay featuring that great actress Ethel Barrymore. The following is the story: Adapted from the novel of the same name by Basil King, this appealing story starring Ethel Barrymore, again demonstrates the power of the screen to give vividness and life and added realism to a book which has been read and enjoyed by thousands.

Striving to live down and forget a past which continually haunts her, Clorinda Gildersleeve in order to be fair to the man she loves and who loves her, confesses her mistake to him, only to find that his love is not big enough to forgive. Then she attempts to seek solace elsewhere, but the old love will not be downed, and finally behind the veil which she has drawn across the past comes the belief that in service to humanity alone will she find peace. How she finds also that the man does love and forgive makes an interesting story.
