A LESSON FOR US.

Winston-Salem attained its title to being the largest city in the state by dint of consolidation, enlargement of the corporate limits and new industries. It is a story of hustle. Winston-Salem with nearly 50,000 population will keep the lead, though Charlotte will make a bid for first place in 1930.

The Record knows Winston-Salem is it knows its own home town. It knows the spirit there, the men who have done things and who will continue to do them. The spirit and the men are about like the spirit and the men in Hickory. The tobacco industry there is the mainstay; here the wood-working plants are the big industries. Big population figures do not count unless they represent vice leadership and citizenship. Here too Hickory is on a par with the premier city in the state.

Another fact which the Record as noted from time to time is that Hickory bears the same relation to the mountain section north of here as Winston-Salem bears to the mountain section up the Wilkesboro road and in Wilkes, Ashe and Alleghany counties. Both are gateways and produce moving eastward is bound to flow through each city from a back country. The difference is of course that Winston-Salem taps a larger country because of better railroad facilities. That is an advantage that can be overcome with the truck line to Boone or by extending to Carolina & North-Western deep into the mountains.

North Carolina is dotted with bustling towns, some of which have grown naturally and steadily and some of which have lagged. Hickory's growth will be shown to be steady though some cities in its class, statistically speaking, will show a larger percentage of gain. This gain will be largely as a result of the growth of the furniture and textile manufacturing business and to enlargement of town limits. Thomasville is caught in point. Nobody anywhere could concede that Thomasville is in the same class with Hickory in a commercial and industrial sense, but its population is larger.

Of course we are not including the people who live in the suburbs, we cannot tell from the highway or broad where Hickory begins and ends, so closely have the suburbs clung to it. We are all one, but census figures will not show it. At least estimate would make the population in a radius of two miles the square between 11,000 and 12,000. There are about 12,000 people that radius. Hickory proper will show less than 5,500.

With the great demand for homes and with an ideal climate, Hickory business men should see to it that at least 50 new homes are erected this year—besides those that will be built by men who are bound to have places which to live. We need not extend our limits, but we should make room for more people inside the present town. That is a lesson we should learn from the census figures being issued these days.

And don't forget Chautauqua. Here are some 50 reasons why you would not, but these, as good as they are, are not the important ones. Chautauqua will do you good, 50 reasons, by the way, are guarantors who have signed up to assure all of us of the enjoyment and entertainment and instruction at are given in one big week.

Woods Hole is said to be too noisy for the president's summer home. After Washington and the senate, should think any place would be quiet.

Ordinarily the Record takes little stock in politics but it will inform those of its readers interested in the lieutenant governorship that F. C. Harding, of Greenville, for several years a member of the state senate, is worthy of the place and by ability and training is competent to fill the governor's chair. Senator Harding is a brother of Judge Harding, of Charlotte, and Superintendent Harry Harding of the Charlotte graded schools. He is a splendid man and the Record trusts that he will receive many votes in this section, despite the fact that he has written no letters and spent no money, so far as we know.

There is great deal of interest as to the population of Newton, and the statistics for our neighbor soon will be issued. If Newton had started to growing nine years ago and had moved forward as steadily as has been the case in the past two years, the figures would be very different. Here is an instance of a city that has found itself in the last few years. You will have to watch Newton in 1930.

Already interest has been aroused in clean-up week, the date for which has been anxiously awaited by many householders. It will be the week beginning May 3. We believe the Record reaches every home in this community, but it might be well for anybody interested to mention clean-up week to his neighbor. It should be made a success.

Of course the railroad strike is a serious thing and it will be serious even if it ends soon. The fact that the men would not listen to their elected heads is disheartening, but it is not a sign that the men are bad. The world is rather touchy just now and a great many people are not their natural selves.

Sure thing, we don't expect to knock the men who are trying to put up a new municipal building, as long as there are firemen in the city. Those boys will make one feel bad just to think that anybody would oppose it.

Let's push the Fourth of July celebration. The Record will contribute what it can to making the event a success and its whole force will take a day off and join the crowds.

The difference between Senator Overman and a great number of antis is that they are not asking for any office and can lose nothing by saying what they think.

There are many modern cases of the office seeking the man, but the jobs don't pay much.

Baby Marie Osborne (Palto).

**THAT COLD WON'T
BOTHER YOU LONG**
Not if you let Dr. Bell's Pine-Tar-Honey help relieve it.
COLD-DISCOMFORT is something no man, woman, or child should be bothered with for any length of time. The pleasant ingredients of Dr. Bell's Pine-Tar-Honey help wonderfully in loosening phlegm and congestion, easing the breathing and relieving cough, bronchitis, cold inflammation, hoarseness.
The test of time has favored Dr. Bell's Pine-Tar-Honey. It helps speedily, safely, to start a cold-sufferer on the road to normal. No medicine cabinet should be without it.

To Fortify the System Against Colds, Grip and Influenza
VICK'S VapoRub is the best remedy for colds, grip, influenza, cough, and all other ailments of the respiratory system. It is the only remedy that acts directly upon the cause of the disease.

We Was a Misery
Mrs. F. M. Jones, of Palmer, Okla., writes:
"From the time I entered into womanhood... I looked with dread from one month to the next. I suffered with my back and bearing-down pain, until life to me was a misery. I would think I could not endure the pain any longer, and I gradually got worse. . . Nothing seemed to help me until, one day, . . . I decided to
TAKE
CARDUI
The Woman's Tonic

"I took four bottles," Mrs. Jones goes on to say, "and was not only greatly relieved, but can truthfully say that I have not a pain. . . .
"It has now been two years since I took Cardui, and I am still in good health. . . . I would advise any woman or girl to use Cardui who is a sufferer from any female trouble."
If you suffer pain caused from womanly trouble, or if you feel the need of a good strengthening tonic to build up your run-down system, take the advice of Mrs. Jones. Try Cardui. It helped her. We believe it will help you.
