By the Associated Press. Greensboro, Dec. 20 .-- A uniform traffic law, a title act to protect automobile owners, the regulation of sal-

aries and fees of rural arresting officers, licensing of all drivers and the regulation of motor busses and trucks are among the most important measures of the Carolina Motor Club's legislative program, which now is being prepared for presentation to the general assemblies of North Carolina and South Carolina, it was announced here

Last Christmas season several Hick- A questionnaire, containing the sug-

The fourteen suggested reforms are as follows:

"First: North and South Carolina sonally acquainted with M. H. John- should adopt a uniform traffic law enacted in many other states. Such a law would certainly add efficiency to the enforcement of the traffic regulation, and make motoring more of a a small campaign in behalf of funds pleasure. Your club now has on hand to purchase fruits, candies and toys conies of the uniform law as worked for the Baker mountain school chil- out by the National Automobile Chamdren. Mr. Abernethy has asked the ber of Commerce, the American Auto-Record to receive any subscriptions mobile Association and other national that may be made, and this paper bodies. Some states have already

some too. Collection boxes will be "Second: Urge a certificate of Title placed at the drug stores and cheeks act to protect the title to motor vecan be made out to L. F. Aberneth; . hicles in North and South Carolina; to rates and of title and evidence of regstration thereof; to regulate the recovery of motor vehicles stolen or othrwise unlawfully taken; to provide for the regulation and licensing of ertain dealers in used and second hand

"Such a law is now in force in foureen states. Its purnose is chiefly to revent the sale of stolen cars, it eems reasonable that titles to motor chicles should be provided just as ovided for real estate. The cost of he title would be about one dollar.

"Third: One of our prominent banker members recommends the enactment of a law to regulate salaries and fees paid the rural officers in the matter of arrest of people using the highways. The suggestion is made that numerous arrests are made in order to 'help business.'

"Fourth: Members report there is no differential on large trucks, equipned with solid tires. It is suggested that this pneumatic equipment certainly is much easier on the road, and Carolina State College has been re- there is a differential in their favor. "Fifth: One member suggests some hey have been manufacturing home provision should be made where by the county, when operating motor equipment would be liable for damages caused by their equipment when operated contrary to law, causing damage Dr. Riddick did not give out any to the individual, the same as any othby Iredell County Highway commis-

sion, running without lights after The resignations have been turned dark, ran into an automobile in which in by the instructors, he said, and no he was driving, damaging same badly. occupants. The member was unable to recover anything on account of the fact that there is no provision under experiences so that all will be in the hands of the legislative committee.

"Sixth: The suggestion is made of the absolute necessity of having a law requiring all moving vehicles, whether horsedrawn or otherwise, to carry a light after dark. It is not only unfair to motorists to be subjected to wagens and buggles and horses on the road without proper designation after dark, out it is very dangerous to these people. "Seventh: Use of two state license

plates instead of one is suggested because the state loses so much advertising when the car is in other states, and at times the motorist experiences were made again in the senate today trouble with small town officials who are not acquainted with our law and

"Eighth: Licensing of all drivers, including owners of motor vehicles, apand physical examinations and pay a fee of from \$1.60 to \$5.00 for drivers' license which may be revoked by a traffic court or the secretary of state. "Ninth: Regulation and restriction

of the operation of motor busses and trucks in the state and inter-county highways. It is suggested that all commercial vehicles should be placed under the jurisdiction of the state corporation commission and that commeral vehicles using highways should dealt with as common carriers; that he size, height and speed of the veicles should be limited by law and hat they should be taxed in direct proportion to the benefits they derive
