OLLAR A YEAR.

BEESDAY, JUNE 26, 1889.

THE DISPATCH IS THE ONLY CHARTE MERSPAPER IN DAVID-HE CHUNTY, AND IS THE ONLY NEWS-REER DUBLISHED IN DAVIDSON OUNTY THAT IS IN SYMPATHY WITH HE OBJECTS AND MINS OF THE DEN-

The Sway of the Boss.

The rumor current in Washington ome time ago to the effect that Dr. d as the boss and dispusser of edation favors in North Carolina, has been abundantly confirmed nt events. The first indicain supports of the rumor was the appointment of Mr. Price to the office of district atterney. Dr. Mott's on Marshall was an applicant for the osition, but his youth and inexpee stood in the way of his receiving the appointment. The show was kept up however, when oly, like a clap of thunder from a clear sky, the appointment of Mr. Price was announced. In due course of time, the appointment of Marshall Mott to the office of assistant district attorney followed. Dr. Mott apported Mr. Eaves for collector of ternal revenue, and Eaves was ap-pinted. Forthwith W. W. Mott, aner son of the dispenser of offices, was offered the principal clerkship in the collector's office, and accepted it. And now we hear that the second clerkship in the office has been given to still another son of Dr. Mott.

These appointments clearly indicate that the authority of the bosa is firmly established. Office seekers who stand in with him, will be likely to get something. All others may well deposit their applications and mmendations in the kitchen e for all the good they will do. This state of affairs is not relished by he fellows who are not in favor with the boss. Some of them have done ne pretty vigorous kicking; but lished that way, they are gradually g down to a condition of silent st. Several long faces hereainelcate the disappointment that has blasted the fond hopes that so receiv budded and blossomed; they are as nothing compared th what will be when the huned or more expectant store-keepers this county are sifted down to a ero handful.

We note with regret, the announce-test that Mr. Thad. H. Manning, ablisher of the Henderson Gold

ev. Boylus Cade, who is, we be-c, a Franklin County man, a that preacher, and erstwhile a alry newspaper editor, has recent-erfected an invention that places at the head of North Carolina cators and among the first in the smitting and receiving tele-menages on a rapidly movin. A telegraph wire stretch-the crise ties, a wooden frame at to the side of the cor, with of metal in contact with the nd connected with the car, are plunces by which one of the a scientific feats of the century a preformed. The invention in a practical test last work delega and these Railroad. Is droubed the leasure hours a years to studying out the

what to expect that the ther salute in the criminal code ake of voting to legalize the business. Certainly this does not prove that prohibition is weakening. On the contrary it proves that certain citizens in office have assumed the fearful responsibility of defeating the will of the people and the people in sheer desperation, are going back to icensed for rooms.

The Moral of a Failure.

The Carthage Blade has ceased to exist. In its last issue the editor says 'We can't run a paper without money, therefore we cannot issue the Blade agulu. Our patrons will not pay, and we are neither able or inclined to longer give them our time and material for nothing."

It is a pity that men will persist by painful personal experience in learning that it requires money to run a newspaper. They do not seem to be willing to profit or be warned by the experience of others. As fast as one paper suspends another begins publication, and after a precarious existence that succumbs and then another makes the venture and meets the same fate. North Carolina has well been termed the grave-yard for newspapers, and every year new victims crowd it. And the cry is still

The moral of this is, that the citisens of a county in which a good county paper is published should give it a liberal support.-Chatham

Lives Lost in a Storm. LITTLE ROCK, Ark., June 21 .- A

distressing story comes from Clinton, on the upper Red River. An old man named Emerson was with his family in his house at night, when a flerce storm arose. After an hour's rain, the water gradually flooded his house, and fearing danger inside, he gathered two of his children in his arms and made for the door to escape. As the door opened, a huge log affoat dashed in the entrance and knocked the little ones from his arms. They fell at his feet into the swift current and were lost. He'then took up two more, one in each arm, and succeeded in getting out with them safely, telling his wife to follow with the others; but in attempting to escape in the same manner, the mother with two children in her arms and three clinging to her dress was carried down with the flood and drowned. The father and two children, the only ones left in a family of eleven, escaped with their lives, The night was dark, and the father, with only Log and president of the North Car-two survivors, stood in water above his Press Association, has deterand is remove to a distant state. In the morning, cearch was made and in the morning, cearch was made and the dead bodies of the mother and parture will the seven children were discovered a pusitive loss to North Carolina scattered here and there for a considerable distance around the place, their ciothing having caught in underbrush and the lookout for a good that way. Two of the bodies were found in the garden lot, a short dis-tance from the house, where they had been carried by the force of the water, and others as far us 50 yards from the house.

Killed His Brother in a Drunken Spree.

Near Gibsonville, but this county, on Thursday 18th inst., Sidney Sutton, a youth 17 years of age, cut his brother George with a pocket knife from the effects of which he died. from the effects of which he died. The circumstances of the tragedy are about as follows: George, John and Sidney Sutton went to Daniel Patton's distillery to get whiskey. Sid had taken enough to be quarrelsome, and was about to get into trouble. His knife had been taken from him His knife had been taken from him and his brothers were trying to get him off home. When they had gone about 75 yards they all get into a south. Sid, thinking some one had his knife at the place where the liquer was sold, wanted to go back, but George, having the knife, gave it to him, thinking thereby to get him sleng better. Purther scuffing occurred, when Sid cut George in the genn, severing the function which the victim tied is death. A physician was stimmened but his

The association will mest in the city of Montgomery, Ala., on the 20th of August, next. Reduced rates, on all lines of railway will be secured, as also at the hotels and boarding houses of that city, and will be furnished to delegates in due time by the secretary.
Composed of leading, practical agriculturists of the South, this body will represent the enterprise and progressive thought, which new conditions and surroundings have evolved and which must solve the great economic questions now confronting us. Let every state be fully and strongly represented. Important questions affecting the material advancement and industrial development of the South, and especially the promotion of her greatagricultural interests will be considered.

Encouraging Science.

Encouraging Science.

The Vermont Microscopical Association has just announced that a prize of \$250, give by the Wells & Richardson Co., the week-known chemists, will be paid to the first discoverer of a new disease germ. The wonderful discovery by Prof. Koch of the cholera germ, as the cause of cholera, stimulated great research throughout the world and it is believed this liberal prize, offered by a house of such standing, will greatly assist in the detection of micro-organisms that are the direct cause of disease and death. All who are interested in the subject and the conditions of this prize, should write to C. Smith Boynton, M. D., Sec'y of the Association, Burlington, Vt.

The Eleventh Census.

The eleventh census, when completed, will be of immeasurable importance to the future of the South. It will show its progress in a decade of industrial development that has no paralled. It will demonstrate that all conservative estimates of its advancement have been much short of the real facts. We notice in the North Carolina papers that Hon. John Robinson, commissioner of agriculture of the state, has already published an official circular letter addressed to the farmers, urging them to be prepared to give complete information to the enumerators. We should be glad to see similar action in every southern state, for nothing will do more to advance the price of their agricultural lands and to increase their farming population by immigration than the publication by the government of the statistical information they will be called upon to give.—Manufacturers' Record.

Secretary Rusk says he is engaged in writing a book treating of the common disease of horses and cattle. "I presume the veterinary surgeons will jump on me," he says,

LEXINGTON N. C.

This school presents the requisites of a successful and flourishing institution. Lexington is noted for it shealthful climate, and the community for its morality and intelligence. The Seminary is a large and convenient building, having a handsomely furnished chapel and six pleasant and commodious recitation rooms. Superior advantages offered in all the usual branches of study. Constant effort will be used to incite pupils to active and accurate investigation. We invite attention to our methods and terms. The principal has been very successful in the management of schools. Miss Laura Clement will continue in charge of the primary department. Miss Octa Hargrave will teach music, elecution and calisthenics.

Boys UNDER FOURTEEN YEARS OF AGE will be admitted.

Tuition in Primary Department,

2.25 per month Tuition in Advanced English.

3.00 per month Languages.

All payable monthly. For further information address
