A most wonderful phenomenon has taken place in the heavens. For ages and ages Venus has been revolving around the Sun in her orbit, but now she has disappeared and another star has taken her place! Has anything more extraordinary ever happened during the history of man? For some time people have been rising quite early in the morning to see a very a brilliant star, which the newspapers say is the "Star of Bethlehem." As the Salem Almanac locates Venus in the exact spot the "Star of Bethlehem" occupies, we have concluded that Venus has been struck by some mighty meteor and been demolished, and this new star has taken her place. Wonders, we know, will never cease, but this is the most wonderful of all the wonders we have ever wondered at.
