Governor Puts Blame On A. J. Maxwell For Any Lack of Revenue

Asheville, N. C. July 25—Declaring that he felt the interests of the state required that he should make a further statement on the state's financial condition, Governor Morrison last night charges that "if the revenue bill of 1921 failed to levy the necessary revenue upon the people of the state to meet the appropriations and expenses for the two calendar years ending December 31, 1922, Mr. A. J. Maxwell is more responsible for that fact than any other man connected with the legislation".

The governor's statement was issued in reply to Corporation Commissioner A. J. Maxwell's observations on the recent audit of state finances which was instituted when he (Mr. Maxwell) charged a deficit of \$5,000,000 existed in the current revenues as of December 31, 1922.

Governor Morrison declared that Mr. Maxwell wrote the revenue bill of 1921 and took great pride in it and that when he appeared before the finance committee he found Mr. Maxwell as his chief adviser and that his (the governor's) suggestions as to changes in methods of financing were approved by Mr. Maxwell.

In his statement the governor declared that the only deficit which existed in the state's finances existed prior to his administration and was caused by a special levy for the schools of the state causing a deficit of \$710,000. He insisted that the special legislature of 1921 had arranged for financing this and that according to the auditor's statement on present conditions the general revenues of the state at the present time could pay off \$220,000 of this school deficit. He expressed confidence that the unpaid taxes due the state through December 31, 1922, would prove sufficient to wipe out the remaining portion.

RULE OF REASON SHOULD GOVERN DRIVING CARS

Chicago, Ill., July 25—Safety is the only limit to automobile speed in France. It may be 70 miles or 7. Although there is a law setting the maximum road speed at 25 miles an hour it is not enforced the rule in almost general application being that the motorist is within the limit if he operates with safety.

Captain Marcel de Jarney, European representative of the Yellow Cab Manufacturing Co., brought word of this condition to President John Hertz of the company on his arrival in this country recently.

Captain de Jarney was told by Mr. Hertz of the recent decision of Common Pleas Judge E. P. Middleton of the Champaign County (Ohio) courts that with a clear road a wide road bed and an automobile in good mechanical condition a motorist may drive practically as fast as the power of his machine will permit in the rural districts without being subject to conviction.

The court in its decision declared that while there was practically no limit on clear wide roads a speed of under 30 miles an hour might be considered excessive and the driver subject to arrest when the road was narrow, crowded with machines and the road bed in bad condition. In other words the rule of reason applies.
