A Tale of a Bridge

(Series, No. 1)

VERY man is entitled to his opinion. It is Conly fair to show a proper amount of respect for the opinions of others. But the opinion even of good men does not always settle a matter. People now-a-days more than ever, want the facts and failing in this they cease to be content, and then turn naturally to suspision.

Once suspicion breaks out and men become distrustful of their neighbors, false impressions arise, this then is followed by conclusions which are wrong, because based on falsehoods and the public mind is not far short of confusion.

When a man is in this condition, he will believe most anything he hears that is bad. He is apt to assert that everybody is crooked. There is very little use in trying to convince him that he is wrong. He has about passed the stage when facts appeal to him. Facts did not reach him in time.

There may be some men in this fix today.

Leaksville Township has had a remarkable growth the past few years. When R. E. Wall became chairman of the Board of County Commissioners, there was mud, shoe-top deep, from beyond the covered bridge across Dan River, through the towns of Leaksville and Spray, all the way to Draper, and for miles beyond Draper-one continuous stretch of dirty, inkish mud for several months in the year - with rough, frozen roads in winter-and dust, inches thick in summer, for each passing wind to blind, chock and poison one who would venture out at certain times.

Mr. Wall, probably as much or more than any other man in the county, is to be thanked for starting the good roads movement in this county. Under his administration the county issued many bonds and put the money into good roads and into school buildings.

In due course of time Mr. Wall retired from the Board, but the work kept right on, because the people wanted more good roads. They just demanded that they be taken out of the mud. Delegation after delegation appeared before the Board every time they met-pleading for better roads and for more of them. It was almost impossible for the Commissioners to resist these demands. Strong influential delegations would tell the Commissioners they were entitled to what they were demanding. They would not take "no" for an answer.

Nobody cared anything about the bonds that had to be issued and sold to satisfy the demands of good, well meaning, honest, hard working taxpayers throughout the county demanding roads.

Finally, when certain sections got what they wanted in the way of roads, bridges and schools, a storm arose very suddenly and there has been nothing but a continuous turmoil ever since—all aimed at the present Board.
