(By the United Press)

Washington, Sept. 29.—Any purpose that any neutral may have of offering mediation for the European belligerents was removed by a "hands off" statement of Lloyd-George, made yesterday, in the opinion of State Department officials. "A hint to the wise is sufficient," one said. Britain Would Dominate World, Says Germ'n Chancellor.

Berlin, Sept. 29.—Chancellor. Von. Bethmann-Hollweig's Reichstag address, placing the blame for the continuation of the European slaughter at the door of Germany's enemies, won enthusiastic approval from a majority of the members. The chancellor made no offer of peace, but indicated that in view of the utterances of Allied statesman, it would be folly to expect an early ending of the war. The speech lacked the hopeful tone of former addresses. The "desired territorial conquest of our enemies is responsible for the daily piling up of mountains of corpses. The British wish to crush out our existence as a nation. A Germany crushed economically is defenseless from a military standpoint, boycotted by the world, and condemned to eternal feebleness-that is the Germany England wishes to see at her feet. When England no longer fears German competition, France will be bled to death. All the other Allies will become slaves to England, and the dream of British world supremacy is to become a reality. English Press Lauds Lloyd-George.

London, Sept. 29-Lloyd-George's declaration that the war must continue to a knockout and warning to neutrals to keep "hands off," contained in an interview with the United Press yesterday, won the unanimous support of the English press today. It was printed in every newspaper in Great Britain and telegraphed by all news agen-

cies throughout Europe.

The papers comment editorially at length. "The statement utters the immutable will and purpose of the entire British Empire. It is a forcible answer to peace talk, said the London Times. "Interviewing is an American institution which the old world has borrowed. It is only appropriate that in choosing this method of expressing his views the secretary for war should favor with his confidence one of the great American news organizations."

Said the London Express: "To all would-be peacemakers, whether America, Rome or Spain, or another neutral the war secretary bluntly said, 'Keep out of the ring.'
