It is an excellent paper and will doubtless continue to receive the patronage it so cichly deserves,

## THE WORLD'S FAIR.

People grow tired of reading too much about one subject, even it that subject is a big one. A word or two more about the World's Pair, however, may be acceptable.

The best place to enter the grounds, perhaps, is at 64th Street. From that point you soon find yourself right at the most important buildings. The first thing that attracted the writers attention was The first train in New York State contracted with those of the present time. The new train has made the speed 112.8 miles per hour. Old railroad tracts and old trains both of this country and Europe were there, showing the first onsuccessful and the first that were successful. These contrasted with those of the present day show the rapid progress made to transportation facilities.

A steam hammer is on exhibition that weighs 2,400 tons, including foundation. Engine and other machinery there in similar proportion

The Manufactures and Art building is the grandest on the grounds. It covers a space of 301 acres! A walk is made upon the roof about 250 ft, from the ground. This is reached by elevators. The view from this of the lake and of Chicago is magnificent. But don't ask us to describe what is in that build. ing. What art and science have been able to accomplish the past

and striking exhibition of the wonderful products of man's genius.

For magnificent and costly furnishing the French and German exhibits in the art building surpass any others. But for beauty and elegance some of the United States exhibits are comparable to any.

You find in the Fair nearly every species of the human race. All kinds 4 months, ...... 50 of vegetations; trees green, seas soned and petrified; flowers of Oneinch, one time, \$1.00; 25c every description and of all climates. Gold, silver, diamonds and every species of mineral products. South Africa has brought to the Fair 75 cents for each subsequent inservisiones from which diamonds are cut, and they have stamps there for besting up the rock, and the machinery for polishing the diamonds.

In the fishery building is found every species of fish and various creeping things of the sea.

Washington State building is constructed of trees from that State. Some of the foundation timbers are cut. from trees. 7 ft. in. diameter and 350 high. In govern. ment building is a section of a Califorpis tree 25 feet in diameter.

These are only a few things that occurred to us while writing hurriedly. We have not given any idea of that great exposition. Time go You will see wonders of the earth, of the sea and of the waters under the earth.

#### A Burning Building at Chicago.

(HICAGO, Iil., July 10-Fire was discovered in the tower of the big cold storage warehouse, near the Sixty fourth street eutrance of the World's Fair, at 1:50 p. m. While a large number of firemen were on the dome of the building the flames burst out below them and they were forced to jump, to the roof below, a distance of about 100 feet. A few minutes later the tower fell upon the roof, crushing it in and carrying into the burning building a large number of firemen dead and alive. Among those carried down by the tower were some who had come upon the roof to help their companons who had fallen or jumped from the dome.

This all happened in the sight of twenty or thirty thousand visitors to the fair. The excitement among them was indescribable.

Fire Marshal Murray 1 ports fourteen firemen killed, that two or three painters at work in the tower could not possibly have escaped and that several Columbian Guards, who joined in the effort to extinguish the fire at its first appearance.

The cold storage warehouse was destoyed. Its dimensions were 130x255 feet. It had a massive tower running to an attitude of 260 The place was outfitted with a complete apparatus for the manutacture of ice, cold storage, etc. and was on the grounds as an exhi-An artificial nee rink in the top story had just been completed and the place was usually througed with sight-seers.

## Capt. McBee Defiant.

Superintendent V. E. McBee said to a Journal reporter a few days ago that the Richmond & Dauville road intended to transport whiskey for any one who wanted it, and they defy Governor Tiliman to stop them or interfere with them. Further be said, "if the Governor undertakes to interfere with us and the transportation of whiskey by jumping on any one who assists in the delivery of such shipments of whiskey which means defenceless draymen and others equally defenceless,) we will organize under our charter a dray line and carry it to any man's

"Governor Tillman may know a great deal about law, but we don't intend to let him interfere with us in any such a manner. The law of the United States will protect us, as will the constitution, and we will fight Governor Tillman there. Now let him crack his whip and go ahead."-Columbia Journal.

-- CARPETS .--

Why can we sell carpets from 10 to 15 per cent cheaper than the old way of carrying carpets in stock, which necessitates investing a large capital, and there is always more or less remnants left on hand, which has to be sold at a sacrifice in order to get rid of them. As a matter of course, the customer who buys from one of these old style firms, has to pay for the loss on remnants and interest or capital invested.

This is the reason why our modern plan of selling-carpets is much cheaper and better than the old way.

Ist. We Have no Capital invested, as we are Manufacturers' a-gents and carry Samples of Carpet in Stock only, therefore; we can afford to sell for a very small profit. 2st.

We carry a very large assortment of samples for you to select from. After you make your selection, we take the size of your room, and order just exactly the quantity required for the room. In this way we have no remnants left on our bands. This is another saving and the resson why we can afford to sail carpets

No firm in a small town, can possibly efford to carry the assortment of carpets in stock, that we do sample. We can, there fore, give you so much larger assortment
