We cannot but think that this change in the management of our public school system will greatly impair its usefulness. State Su. perintendent Scarboro says in speaking of it: "Our system of public schools is almost rained; we are set back 20 years." The throwing of the management into the hands of the county commissioners entails more work on these officers and will prevent their giving that time and attention to it while a school board, created solely for that purpose, could do; and neith er the appointment of a county examiner to take the place of a superintendent, nor the manner of lynching out in Colorado. In nearly every southern hotel negroes only are employed as servants and thousands of them are thus enabled to earn a good living Still the negroes employed in hotels represent only a small per ent of the negroes who are engaged in granful occupations in the south.
