### Big Noses in Favor.

In Japan the nose is the only feature which attracts attention. The nose dotermines the heauty or ugliness of the face, according as it is big or small. This is probably due to the fact that difference in noses constitutes about the only distinction between one Japanese face and another. The eyes are invariably black, the cheek bones high and the chin receding. In Japan a estatism of a power of advectorial estatism contains decared wavelength by D, and write to A. H. and A. N. ## THE NECESSARY MAGAZINE IN THE PRESIDENTIAL YEAR.

The Review of Reviews is often called a necessity, in recognition of its usefulness in keeping readers "up with the times."

In Presidential election years the REVIEW OF REVIEWS is more than ever "the necessary magazine." Everybody wants to be truly and quickly informed about this or that public question that has forged to the front; to know about the new candidates and personal factors in politics, to have a complete picture at hand of the current movement of history.

In Dr. Shaw's editorials, in its authentic and timely con-tributed articles, in its brilliant character sheather, in its conden-sations and reviews of all the important articles of other magazines, and in its hundred a month of valuable potraits, witty cartens, and interseting views, the REVIEW OF REVIEW gives the much desired news of the world's and our own program. The World under a Field-giass " is the way one subscrifter describes it. Months of the world's and our own program. The world under a Field gias " is the way one subscrifter descrifter the members of Congress, and the great captains of industry, who over America, have decided it is "indispensable."
