MONROE, N. C., TUESDAY MARCH 26, 1907.

VOLUME XIV. NO. 7

## Verdict for Dr. Pierce AGAINST THE Ladies' Home Journal.

Sending truth after a lie. It is an old axim that "a lie will travel seven agues while truth is getting its boots on," and no doubt hundreds of thousands of good people read the unwarranted and malicious attack upon Dr. R. V. Pierce and his." Favorite Prescription " published in the May (1994) number of the Ladies' Home Journal, with its great black display headings, who never saw the hum-ble, graveling retraction, with its incon-spicnous heading, published two months later. It was boildy charged in the sland-trons and libelous article that Dr. Pierce's

later. It was boldly charged in the shand-crous and libeloas article that Dr. Pierce's Favorite Prescription, for the cure of woman's weaknesses and allments, con-tained alcohol and other harmful ingredi-ents. Dr. Pierce promptly brought suit acainst the publishers of the Ladies' Home Journal, for 500,000,00 damages. Dr. Pierce alleged that Mr. Bok, the editor, mailchously published the article containing such false and defamatory matter with the intent of injuring his usines rurthermore, that no alcohol, or other buildings of the ladies' to be all the intent of the ladies' to be all the intent of the ladies' the second state of the ladies' the second state of the ladies' the second state of the later of the second other buildings of habit-forming, drugs are, or later were, contained in his 'Fa-worite the second state in his 'Fa-tories' for one provide the state-ment were wholly and absolutely false. Monster Spider Crabs.

'I have collected specimens of crabs in all parts of the world," said a naturalist, "but 1 shall never forget the pleasure 1 experienced in securing a monstrous specimen of the Japanese spider crab, the largest ever found. The combined length of the feeding right time. arms of this monster was more than twelve feet, while the body portion was about twenty inches across. When alive, it weighed about seventy-five One of the oddest things about these creatures is their ability to assume a disguise. This feat they are able to perform owing to the flexibillty of their pinchers and to the hooked hairs and spines with which their numerous arms are studded. By means of their pinchers they tear off small fragments of sponges and seaweeds. After first putting these to their months, which contain a glutinous saliva, they place them on the surface of their limbs and bodies by sticking them fast with a rubbing movement. By this method the crab appearance and rendering itself indistinguishable from the materials common to the bottom of the sea. While

The Little Colorado river, in Artzona, has long been famous as a locality for such finds. At one place more than 1,500 cords of solid stone, tree trunks, sections, limbs and logs, were found by the government surveyors. Most of them were silicified, many seven to ten feet in diameter and from twenty to eighty feet in height. Geologists say that the petrified trees of the Little Colorado were once covered with marl over 1,000 feet in depth. Some of the trees have been changed to jasper and have assumed various hues; others resemble opal, and when broken open the core is often found lined with crystals of the most beau- experience of others, and after talk- them would soon have gone down tiful tints
