In any condition of the female system,
Dr. Pierce's Favorite Prescription can do
only good—never harm. Its whole effect
is to strengthen, invigorate and regulate
the whole female system and especially
the pelvic organs. When these are deranged in function or affected by disease,
the stoniach and other organs of digestion
become sympathetically deranged, the
nerves are weakened, and a long list of
bad, unpleasant symptoms follow. Too
much must not be expected of this "Favorite Prescription." It will not perform
miracles; will not cure tumors—so medtens will. It will often prevent them, if
taken in time, and thus the operating
table and the surgeon's knife may be
avoided.
