Five years ago The Bank of Union opened for business. At that time there was only one bank in Union county, with assets of about \$200,000.00 or less, while now there are five banks in the county with assets aggregating about \$1,000,000.00. What a wonderful air-baths, as well as those in cold tended. change for so short a time! What is the reason? The principal cause lies in the enhanced values of farm products, but along with this there has been a great awakening in the way of doing business. People who were dead in financial matters have come to life, and they see the dawn of a better day. People are more thrifty than five years ago. They are more ambitious to succeed, and they do succeed. The banks have contributed no little to this revolution in catching colds. He says Dr. Lah its reprehensible practices."

The Bank of Union Has Labored Steadily to Promote Prosperity in Union and Adjoining Counties.

It has spent much money to safeguard the interests of its customers. No bank could do more under the circumstances. Absolute safety and good service are guaranteed. The people should recognize these facts and appreciate them. They could not do this in a more welcome way than by using this bank as a depository. A private room for the accommodation of customers has been provided. There they will find a desk, paper, etc., for their convenience.

Catching Cold--- How to Prevent It.

Just at this time, when nearly every one you meet has a bad cold, an article in the March number of the Ladies' Home Journal, by Dr. Richard Cole Newton, under the caption, "Why do we Catch Cold!" is of special interest.

The writer answers the question by unqualifiedly endorsing Benjamin Franklin's theory on the subject, who declared that colds result neither from cold nor from dampness, but are due to "impure air. lack of exercise, or overeating."

"The underlying cause," says Dr. Newton, "of most colds is overeating and improper eating." In answer to the inquiry, "How does eating too much produce colds!" the doctor says: "By putting too much work on the eliminative functions of the body, a derangement of the vital processes may occur from a comparatively slight cause, like wet stockings or a cold draft, and this 'disturbance of nutrition,' as a great doctor once styled a cold, may be mild or severe in direct proportion to the capacity of the body to take care of its waste."

bely to take our of its water.

Dr. Newton ridicules the old idea that you must "feed a cold you will have a same and the same street and the same

summer, until they were in a perspiration, just as soon as they felt the first symptoms of a cold."

Good for Everybody.

Mr. Norman R. Coulter, a promi pent architect in the Delbert build ing, San Francisco, says: "I fully endorse all that has been said of Electric Bitters as a tonic medicine. It is good for everybody.
